AGANI™

Safety Hypodermic Needle

Injection & Access

Product Information

Secure Safety Activation

The Agani™ Safety hypodermic needles, when fitted with a standard luer slip or luer lock syringe are intended for the aspiration and injection of fluids for medical purposes. After withdrawing the needle from the body, the attached needle safety shield can be activated to cover the needle immediately after use to minimize the risk of an accidental needle stick.

	Description	Raw materials
1	Sheath	Polypropylene
2	Collar	Polypropylene
3	Hub	Polypropylene
4	Cannula	Stainless steel
	Protector	Polypropylene (PP)
