

Use HemoCue Analyzers for Your Research Needs

Lab-accurate and portable devices provide rapid results to assist in quick inclusion/exclusion decisions of study subjects throughout the course of clinical studies.

- ▶ Lab-accurate testing of Hemoglobin, Urine Albumin, Glucose, or White Blood Cell Count
- ▶ Handheld devices allow for maximum flexibility
- ▶ Small sample size drawn from a finger prick or tube
- ▶ Easy and error-free documentation with connectivity and data management options
- ▶ Quick results for immediate inclusion or exclusion decision during recruitment process

Accuracy Starts With Us

Hemoglobin

- HemoCue® Hb 201+ System combines the precision and accuracy of a laboratory measurement with a quick turn around time and ease of use.
- HemoCue® Hb 201 DM System enables connectivity and data management capabilities to the HemoCue product line.
- HemoCue® Plasma/Low System is intended for measurements of low concentrations of hemoglobin in plasma, serum or aqueous solutions.

Glucose

- HemoCue® Glucose 201 Systems produce immediate, accurate results for diagnosing or monitoring diabetes, as well as monitoring neonatal blood glucose levels.
- HemoCue® Glucose 201 DM System enables connectivity and data management capabilities to the HemoCue product line.

Albumin

- HemoCue® Albumin 201 System can be used for the quantitative determination of low levels of albumin in urine for diagnosing, monitoring and supporting the clinical evidence in the treatment of albuminuria.

White Blood Cell

- HemoCue® WBC System is a unique point-of-care testing system for the quantitative determination of white blood cell (WBC) count. It provides quantitative results of a patient's white blood cell count in about 3 minutes.
