## TECHNICAL SPECIFICATIONS

|                      |                                                                                                                                                                                               |        |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| <b>Description:</b>  | Euro-standard plastic case                                                                                                                                                                    |        |
|                      | Bottom                                                                                                                                                                                        | Closed |
|                      | Walls                                                                                                                                                                                         | Closed |
|                      | Handles                                                                                                                                                                                       | Closed |
| <b>Raw material:</b> | Polypropylene (PP)                                                                                                                                                                            |        |
| <b>Usage:</b>        | Lightweight and durable, it features two handles on short sides. Bottom and walls are closed. Easy to clean thanks the smooth inner and outer surfaces. Due to its size is easily palletized. |        |

## DIMENSIONS

|                                |                |
|--------------------------------|----------------|
| <b>Capacity:</b>               | 60 l           |
| <b>Internal dimensions:</b>    | 554x354x317 mm |
| <b>External dimensions:</b>    | 600x400x333 mm |
| <b>Weight:</b>                 | 3,34 kg        |
| <b>Dimensional tolerances:</b> | ± 3%           |

## GENERAL FEATURES

|                                   |                                                                                                                                  |
|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>Semi transparent:</b>          | No                                                                                                                               |
| <b>Colour:</b>                    | Grey                                                                                                                             |
| <b>Load capacity</b>              | 12 kg                                                                                                                            |
| <b>Stackable load</b>             | -                                                                                                                                |
| <b>Dynamic load</b>               | -                                                                                                                                |
| <b>Temperature range:</b>         | -20°C / +80°C                                                                                                                    |
| <b>Autoclavable:</b>              | No                                                                                                                               |
| <b>Sterilizable:</b>              | By radiation                                                                                                                     |
| <b>Conformity with standards:</b> | -                                                                                                                                |
| <b>Food contact compliance:</b>   | The product is suitable for food contact. It meets regulatory requirements of 1935/2004/CE, UE 10/2011 and following amendmends. |

# Technical data sheet

**Item code PL 698****PACKAGING**

|                       |    |                   |               |
|-----------------------|----|-------------------|---------------|
| Pieces per bag (MOQ): | 1  |                   |               |
| Pieces per box:       | -  |                   |               |
| Pieces per pallet     | 24 | Pallet dimensions | 80x120x220 cm |

**REMARKS / OPTIONAL ACCESSORIES**

-

**CHEMICAL COMPATIBILITY**

Products manufactured by polyethylene or polypropylene are normally suitable for room-temperature contact with many organic solvents, diluted solutions of acids, bases and salts. They are typically not suitable for use with concentrated oxidizing acids and halogenated solvents. Detailed information on physical properties and chemical resistance (including concentration and temperature effect) are available upon request.

Several factors however may effect chemical compitbility such as temperature, concentration, contact time, presence of internal stress, wall/film thickness. The user is advised to carry out its own tests to determine product suitability for the particular environment/application.

**STORAGE CONDITIONS**

Product should be stored in its original packaging and kept dry at all times. Regular inspections of shipping box and shipping pallet are recomended. Storage area should be clean and dry. Never expose product to direct sunlight.

Optimum storage temperature is between 10°C and 30°C, 20% to 80% RH

Avoid prolonged storage at extreme temperature. Do not exceed the following limits: -10°C / +40°C
