BinLiner™ Stands

Micronova's **BinLiner™ Stands** are the perfect complement to our portfolio of BinLiner bags. There are two stand choices, rectangular or scissor style frame made of durable stainless steel. Both styles allow for simple, ergonomic side removal of liners.

The unique rectangular stand features polypropylene corner molds that connect the sides and function as the stand base. The base reduces the possibility of rusting directly on the floor surface and slides easily to help prevent scratching. Optional casters can be added for ease of mobility when relocating the bin stand. The scissor stand folds open and closes for storage when not in use.
