

TerraCycle® Zero Waste Box™: A Convenient and Sustainable Way to Recycle Waste

**ALL-IN-ONE
RECYCLING
SOLUTION**

**FREE SHIPPING
BOTH WAYS**

**EASY TO USE, JUST
FILL AND RETURN**

What is TerraCycle® Zero Waste Box™?

TerraCycle Zero Waste Box is a turnkey solution that allows you to recycle hard-to-recycle waste – items that councils or traditional recycling facilities typically don't accept. It is a convenient and sustainable way to keep waste away from landfills and incinerators, and to contribute to a circular economy. There are three standard sizes of boxes, as well as large-volume recycling (by the pallet), which can be arranged on request.

What are the benefits?

By using the TerraCycle Zero Waste Box service, you can:

- Contribute to a circular economy
- Reduce your environmental impact
- Boost employee engagement and satisfaction
- Save costs and space on general waste disposal and storage
- Receive a certificate of recycling upon request

Get Recycling!

The TerraCycle Zero Waste Box is available in the UK, France, Germany, Belgium, the Netherlands, Ireland, Spain, the USA and Canada. To order, visit www.vwr.com/terracycle to view the recycling options available in your country.

For more information, including large volume or custom recycling options, please contact your local Avantor representative.

How does it work?

The process is simple and easy:

ORDER

- 1
 - Visit your Avantor website (vwr.com) and search for 'TerraCycle' to purchase a Zero Waste Box
 - Choose boxes to collect up to 17 waste streams per country, depending on what you want to recycle (accepted wastes include: PPE, lab plastics, water filters, plastic packaging, cleanroom consumables, clothing, wipes and more).
 - Three sizes are available for each box: Small (28L), Medium (78L) and Large (144L).
 - Assemble the box and find a convenient location for waste collection.
 - NOTE: Only non-biohazardous and non-chemically contaminated materials are accepted in the boxes. No sharps or pressurised canisters.

SHIP

- 2
 - When the box is full, seal it with tape and place it in an easy-to-access spot for its collection. The box is then shipped to TerraCycle's local Material Recovery Facility (MRF) for recycling.
 - Contact UPS – using the details on the pre-paid shipping label on the box – to arrange the collection of your box. Return shipping is free and carbon off-set.

TERRACYCLE RECYCLES

- 3
 - The waste is delivered to TerraCycle's (MRF) where it is weighed and sorted based on material composition.
 - Once sorted by category, the different material types are cleaned and then sent to TerraCycle's third-party partners. They're recycled into new materials for the construction industry, automotive industry, other industrial applications, flooring, sports mats and more.

RECYCLING SUMMARY REPORT

- 4
 - You can request an annual recycling certificate at the end of each calendar year to see how much waste you have helped recycle through TerraCycle.
