Technical Information

Memosens measuring cable and installation accessories

CYK10 / CYK11

Application

Measuring cable for all Memosens sensors and sensors with Memosens technology for nearly all parts of process engineering.

- The Memosens data cable CYK10 is used with sensors utilizing the contactless inductive signal transmission.
- The Memosens extension cable CYK11 is used for the connection of digital fixed-cable sensors with Memosens protocol. The following versions are available: Ferrule with ferrule, M12 female connector with ferrule and M12 female connector with M12 plug. CYK10 based installations can also be extended with CYK11.
- CYK10 and CYK11 can be extended with junction boxes.
- CYK10 available in versions for use in hazardous areas

Your benefits

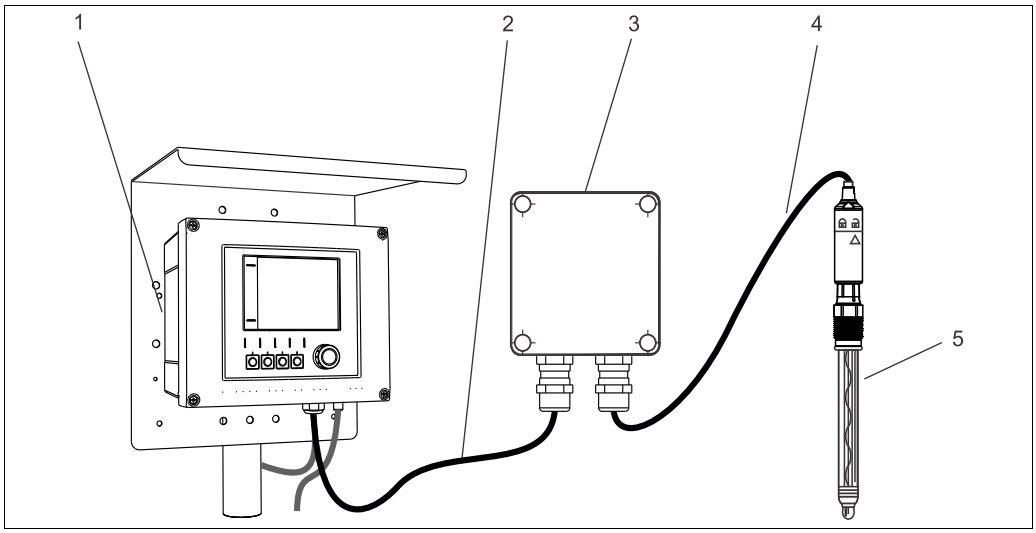

- Memosens data cable CYK10
  - Absolute waterproof connection (ingress protection IP 68)
  - No corrosion of contacts
  - No influence of interfering potentials thanks to galvanic isolation of transmitter and medium
- Memosens extension cable CYK11
  - Absolute waterproof connection (ingress protection IP 68)
  - Flexible and fast in application

5 Sensor

Memosens

Memosens makes your measuring point safer and more reliable:
- Non-contact, digital signal transmission enables optimum galvanic isolation
- No contact corrosion
- Completely watertight
- Laboratory sensor calibration possible, thus increasing measured value availability
- Predictive maintenance thanks to recording of sensor data, e.g.:
  - Total hours of operation
  - Hours of operation with very high or very low measured values
  - Hours of operation with high temperatures
  - Number of steam sterilizations
  - Sensor condition

Connection in explosion-hazardous areas

Connection in explosion-hazardous areas

It is not allowed to use CYK11 as an extension for CYK10-based measuring system in hazardous areas. For hazardous areas it is recommended to use continuous and not extended Memosens measuring cable CYK10.

Ordering information

Product structure

You can create a valid and complete order code using the Endress + Hauser Configurator tool on the Internet.

Enter the following addresses in your browser to access the relevant product page:
www.products.endress.com/cyk10
www.products.endress.com/cyk11

1. The following options are available on the right-hand side of the page:

2. Select "Configure this product".
3. A new window opens with the Configurator. Using this tool, you can configure your device and you will receive a valid and complete order code for this.
4. Then export the order code as a PDF or as an Excel file selecting from the buttons provided at the top of the page.
