

Axygen® HybridRack™ Pipette Tips

Improve your environmental footprint with Corning's innovative hybrid design

Have you ever wanted your lab to use less plastic? Have you been looking for an easy way to be more sustainable around the lab?

Just like you, Corning takes sustainability seriously and is always looking for ways to reduce our carbon footprint. The HybridRack does just that, marrying functionality and sustainability by pairing a polypropylene deck with a paperboard base to allow for more sustainability in science. All without sacrificing quality, comfort, or reliability.

LESS PLASTIC

Innovative paperboard and plastic hybrid design uses **70% less plastic** than a traditional tip rack.

Paperboard base can be easily recycled using most curbside recycling programs which can significantly reduce the amount of plastic being thrown away in the lab.

Axygen HybridRack Pipette Tips are included in Corning EcoChoice™. All products included in the program are produced, packaged, or distributed in an environmentally friendly manner following United States FTC Guidelines. To learn more, go to us.vwr.com/cms/corning_sustainability.

The unique hybrid design creates a stable platform allowing end users to pipet directly from the paperboard base – even with a multi-channel instrument.

- Same consistent and high quality performance you have come to expect from Axxygen pipette tips
- Unique design allows for use as a filter tip reload system
- Plastic deck is compatible with Axxygen MultiRack and Corning® DeckWorks™ pipette tip racks
- Made in an ISO 13485 and ISO 14001 registered facility
- Sterile
- Nonpyrogenic
- RNase-/DNase-free
- Human gDNA- and PCR-inhibition-free
- Available with polyethylene filter
- Available with Axxygen Maxymum Recovery® surface to improve accuracy and ensure maximum sample recovery
