VWR® Stackable Shaking Incubator with Refrigeration

- Stainless-steel chamber for easy cleaning
- Magnetic clamping system for clamps/tubes/ microplates
- Programmable touch-screen controls
- Adjustable static shelf

The VWR Stackable Shaking Incubators provide a space saving design that offers high-throughput capacity. With precision temperature control and high-grade stainless-steel chambers, these shaking incubators provide industry-leading performance with a temperature accuracy of ±0.1°C and a chamber uniformity of ±0.5°C. Two models are available with temperature control up to 60°C. A refrigerated model includes a powerful compressor, capable of maintaining sub-ambient temperatures as low as 4°C*.

The VWR Stackable Shaking Incubator Series features an increased chamber height of nearly 23 inches. This increased height provides compatibility with high-capacity Erlenmeyer flasks, accepting up to four 5-liter Erlenmeyer flasks. An adjustable shelf is included with the incubator, supporting still incubations of plates and dishes, even while the shaking platform is in use.

Each incubator is supplied with a standard, non-skid silicone mat that is suitable for low-speed shaking applications. An optional, universal platform is also available for securing a wide range of flasks, tubes and other common vessels.
