

DIVERSA

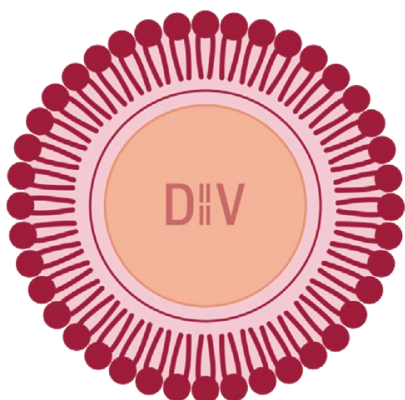

DIVERSA is a biotech company promoting the transfer to the clinic of new therapeutic molecules by the application of drug delivery technology.

Our aim is to build a bridge between drug discovery and clinical application.

DIVERSA aspires to become the company of reference for drug delivery, opening up new opportunities for innovative medicines and improving patients lives.

OUR TECHNOLOGY

DIVERSA's technology is a unique formulation based on lipid nanoparticles for drug delivery and transfection in a easy, efficient, and convenient way.

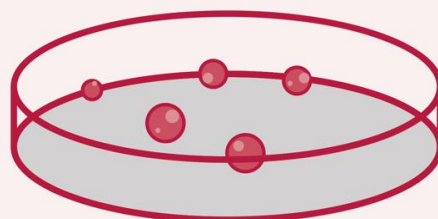

- **Patented nanoparticle composition**
- **Versatile and translatable**
- **Simple and cost-effective**
- **Fluorescent labelling available**
- **Biocompatible and biodegradable**
- **High loading capacity and stability**
- **Customization available**

APPLICATIONS

IN VITRO

- Labeling of live cells
- Tracking cell internalization
- FRET studies
- Intracellular delivery of therapeutic compounds
- Therapeutic evaluation
- Cytotoxicity studies
- Protein replacement therapy
- Enhance molecule activity
- Reduce secondary effects
- Solve solubility problems

IN VIVO

- Biodistribution evaluation
- Therapeutic evaluation
- Cell tracking

DIVERSA's nanoparticles are the most convenient solution to advance your preclinical research

Cell Tracking

**DIVERSA FluoGreen cell
internalization Reagent**

Small Molecule

**DIVERSA Small Molecule
Delivery Nanoparticles**

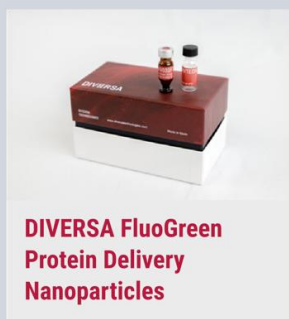

**DIVERSA FluoGreen
Small Molecule
Delivery Nanoparticles**

Protein

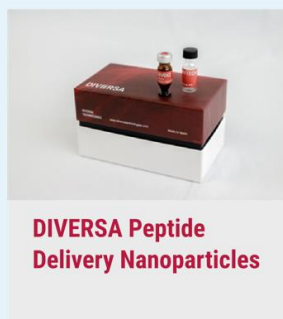

**DIVERSA Protein
Delivery Nanoparticles**

**DIVERSA FluoGreen
Protein Delivery
Nanoparticles**

Peptide

**DIVERSA Peptide
Delivery Nanoparticles**

**DIVERSA FluoGreen
Peptide Delivery
Nanoparticles**

mRNA

**DIVERSA mRNA
Delivery Nanoparticles**

**DIVERSA FluoGreen
mRNA Delivery
Nanoparticles**

Customized Nanoparticles
