BSE/TSE Statement: The film and resin suppliers confirm that some films, resins and masterbatch additive packages used to manufacture SUPROP® type film products and other films, may contain byproducts of bovine sourced raw materials in their manufacture. As advised by these suppliers, these animal byproduct additives are processed under highly refined and controlled industrial chemical processes and at very high temperatures prior to purification and subsequent use as a polymer additive. This applies to all products comprised of either polypropylene or low density polyethylene polymers. The animal derived byproducts are not added during the process of manufacturing of the product, but originate either in the manufacture of the resins or in the additives used in film formulations.
