Microlab® 600 Series
GLP/GMP Compliance Package

Hamilton Company now offers an enhanced feature to the Microlab® 600 Advanced diluter and dispenser – a comprehensive compliance package. The diluter and dispenser can now be used in CFR 21 Part 11- and FDA GMP/GLP-compliant laboratories, or any other facility that adheres to a security protocol, thanks to an accessory printer kit and new compliance software package that comes standard on all Advanced Microlab 600 devices and is available as a free software update for existing users. Highlights include the ability to administer user accounts and passwords, create log files that conform to CFR 21 Part 11 and manage log files on a PC using the LyncStore™ application.

The compliance assurance software update works in tandem with the new Microlab 600 Advanced printer kit. The kit is an accessory item that satisfies regulatory hardcopy requirements by allowing users to print log files directly from the device.

This package is designed for:

- FDA GXP regulated facilities
- Pharmaceutical manufacturing
- Clinical testing
- QA/QC laboratories
- Contract manufacturers

HAMILTON®

Compliance and Security Features

Enhanced Security Settings

- Create password protected user accounts, and define roles and permissions
- Track all user activities in log files compliant with CFR 21 Part 11
- Use electronic signatures and ensure user accountability

Advanced Log File Management

- Store log files on a 2GB card or permanentaly via LyncStore
- Archive, sort and filter log files with LyncStore PC-based management system
- Print log files to any printer connected to the PC

Convenient Printing

- Print log files directly from the controller
- Maintain internal records of pump usage
- Implement the requirements of close circle reporting
