Product Description

Certain controlled tasks require very specific wiping products and dispensing systems. With this in mind, expertise and wiping technology was applied to create a premium-quality task-specific range that can help maximise efficiency and productivity while reducing wiping and solvent costs. Kimtech® Wettask™ DSX wipers for solvents are designed for use with the Wettask™ system wiper roll dispenser bucket. The refillable, airtight wiping system holds these cleaning wipes to which you can add your chosen solvent, disinfectant, chemical or detergent. The system's unique self-closing lid reduces worker exposure to harmful VOCs by keeping the system closed at all times, helping to control the costs of solvents and improving safety by reducing spills. These hygienic dry wipes are resistant to mould and bacteria. Perfect for infection control in busy healthcare environments, these strong, low linting, perforated disposable cleaning wipes are ideal where hygiene and safety is of key importance. These Kimtech® Wettask™ cleaning wipes have been tested as compatible for prolonged, fully saturated use with peracetic acid, hydrogen peroxide, methyl ethyl ketone, isopropanol, acetone, bleach (sodium hypochlorite) and quats (quaternary ammonium compounds). Always follow manufacturers' instructions for dilution, application and contact time. These disposable industrial wipes are compatible with Wettask™ system wiper roll dispenser bucket (product code 7919). Each individual cleaning wipe measures 31.8 cm (L) x 30.5 cm (W). 6 Rolls x 90 White Cleaning Wipes (540 Total)
