

VWR® Single Well Tissue Culture Plates

Description: Single Well, Surface Treated/Non-treated, Sterile

Purpose: For use in applications where cell attachment is desired or not desired

Materials

Plate: GPPS (General polystyrene) Color: Clear

Lid: GPPS (General polystyrene) Color: Clear

Features

- Single well plates have increased internal plating dimension, providing larger area for cell growth
- Plates have a standard external footprint, making them compatible with other instruments that accept SBS-standard plates
- Suitable for robotic handling
- Temperature: -20°C~+50°C
- Sterilized by irradiation SAL 10⁻⁶ (ISO11137)
- DNase/RNase free, Non-pyrogenic
- Autoclavability: No
- Assembled plate and lid height: 17.5 mm
- Max. volume (single well): 90.0 ml
- Working volume (single well): 35.0 ml
- Growth area (single well): 97.0 cm²
- Every product is printed with a batch number for traceability
- Shelf Life: 3 years after month of production
- Manufactured in a Class 100,000 clean room environment
- Manufactured under ISO13485 and ISO9001 quality management system

Dimensions (Unit:mm)

VWR® Single Well Tissue Culture Plates

VWR EU Cat. No.	VWR NA Cat. No.	Description	Sterile	Qty/Pk	Qty/Case
734-2977	75780-348	Single well, General, Non-treated, Sterile	Yes	10	100
734-2966	75999-254	Single well, Standard, Surface Treated, Sterile	Yes	10	100

VWR® 4 Well Tissue Culture Plates

Description: 4 Well, Surface Treated/Non-treated, Sterile

Purpose: For use in applications where cell attachment is desired or not desired

Materials

Plate: GPPS (General polystyrene) Color: Clear

Lid: GPPS (General polystyrene) Color: Clear

Features

- 4-well plates have a pinchbar design, and flat-bottom round wells, with lid
- Lid with notched corners for good fit and easy orientation
- Wells are labeled with alphanumeric code for easy identification
- Temperature: -20°C~+50°C
- Sterilized by irradiation SAL 10⁻⁶ (ISO11137)
- DNase/RNase free, Non-pyrogenic
- Autoclavability: No
- Individual trays are PET and recyclable
- Assembled plate and lid height: 13.5 mm
- Max. volume (single well): 1.86 ml
- Working volume (single well): 1.0 ml
- Growth area (single well): 1.96 cm²
- Every product is printed with a batch number for traceability
- Shelf Life: 3 years after month of production
- Manufactured in a Class 100,000 clean room environment
- Manufactured under ISO13485 and ISO9001 quality management system

VWR® 6 Well Tissue Culture Plates

Description: 6 Well, Surface Treated/Non-treated, Sterile

Purpose: For use in applications where cell attachment is desired or not desired

Materials

Plate: GPPS (General polystyrene) Color: Clear
Lid: GPPS (General polystyrene) Color: Clear

Features

- Lid with notched corners for good fit and easy orientation
- Wells are labeled with alphanumeric code for easy identification
- Temperature: -20°C~+50°C
- Sterilized by irradiation SAL 10⁻⁶ (ISO11137)
- DNase/RNase free, Non-pyrogenic

VWR® 96 Well Tissue Culture Plates

Description: 96 Well, Flat bottom, Surface Treated/Non-treated, Sterile

Purpose: For use in applications where cell attachment is desired or not desired

Materials

Plate: GPPS (General polystyrene) Color: Clear

Lid: GPPS (General polystyrene) Color: Clear

Features

- Lid with notched corners for good fit and easy orientation
- Wells are labeled with alphanumeric code for easy identification
- Temperature: -20°C~+50°C
- Sterilized by irradiation SAL 10⁻⁶ (ISO11137)
- DNase/RNase free, Non-pyrogenic
- Autoclavability: No
- Individual trays are PET and recyclable
- Assembled plate and lid height: 16.0 mm
- Max. volume (single well): 0.39 ml
- Working volume (single well): 0.075~0.2 ml
- Growth area (single well): 0.33 cm²
- Every product is printed with a batch number for traceability
- Shelf Life: 3 years after month of production
- Manufactured in a Class 100,000 clean room environment
- Manufactured under ISO13485 and ISO9001 quality management system
