

Animal Origin Declaration

106504

Sodium deoxycholate for microbiology

This is to declare that a. m. product contains the following animal-sourced components:

Component	Geographical origin	Species	Animal part*
Deoxycholate	South America, Mexico, Australia, New Zealand, USA	Bovine	IC

*according to Note for Guidance of the EC on minimising the risk of transmitting BSE (EMA/410/01 Rev. 3)

Since we hold confirmations from our raw material suppliers that they adhere to the European legislation, and the derivatisation process from the bovine material to the product used as ingredient follows all relevant and commonly accepted deactivation rules, the risk of BSE - possibly arising from a. m. product - is reduced to an utmost minimum respectively does not exist.
