New Racks – Improved Sustainability

How to reduce plastics in the lab –

The epT.I.P.S.® solution

Disposable racks for pipette tips are very often unavoidable, especially when working with sensitive sample material that requires reliable sterility and purity. For epT.I.P.S., we have decided to completely re-design our racks to greatly reduce the use of polypropylene granulate by modifying the design without risking the tip quality, sterility, and purity. In addition, significantly improved usage benefits for the user could be achieved.

New epT.I.P.S.® Racks

Tip and tray quality remain unchanged.

- > Slim rack size – easy to carry also for small hands
- > Lid with locking option – can be re-closed after use for more tip and handling safety
- > Optimized stackability – all rack sizes can be safely stacked on each other

New Product Identification Label

- > Quick tip identification

New Sealing Label

- > Connects lid and bottom
- > Guarantees integrity of purity and sterility

New Product Label
