

ReptiFauna™

HAWORTHIA

Grow your reptile, amphibian, or invertebrate jungle with ReptiFauna™ desert plants.

These plants are perfect for naturally enhancing your animal habitat and are easy to care for.

Origin: South Africa

Care Level: Beginner

Light: Partially Shaded

Humidity: Dry 0-30%

Environment: Desert

Placement: Midground

Water Frequency: Every two weeks

Growth Rate: Slow

HUMIDITY:

0%  100%

TIPS:

- Water only when substrate is completely dry or when leaves begin to curl/wrinkle.
- Underwatering is better than overwatering.
- Water the substrate and not the leaves.
- Lack of light can cause the plant to lose the intensity of color.

TO GET STARTED:

- Prepare the substrate by digging a small two inch hole to accommodate the plant
- Remove the plant from the pot being careful to not damage the roots
- Gently remove as much substrate from the plant and discard the substrate in the trash
- Lightly rinse the plant under de-chlorinated room temperature, or distilled water
- Place the plant in the hole in the substrate
- Fill in the open areas in the hole with substrate until it covers just up to the base of the plant
- Gently smooth out the substrate
- Water according to care directions below, always using room temperature water
- (Note: only water the substrate and never the leaves of this plant)
