Product specification for art. no. 60236

Product description: ALU round discs, soft, plain
110 mm Ø,

Product specification:

Material:	pure aluminium foil, soft (= temper O)
Thickness:	0,030 mm

Packing: 1000 pcs/unit

Characteristics of the aluminium foil

Indicative values:

Electrical conductivity	36,9*106 Siemens/m
Electrical resistivity	2,7*10-8 Ohm*m
Thermal conductivity	237 W/(m*K)
Thermal expansion coef.	23,5 *10-6 K-1 (von 0-100 °C)
Density	2,7 g/cm3

Tolerances:

Foil thickness	± 8 %

Fire classification A1 according DIN 4102 and EN 13501-1
Melting point at 580 °C - 600 °C

Product qualification: Aluminium is stable between the pH values 4 and 9.

Storage and durability: Temperature 5 – 30 °C, max. 70% relative humidity, no direct sun exposure

All data are based on our knowledge and experience. It's intended as an advice without legally binding.
