FUNNELS

Ref. **4250**

- 18/10 stainless steel.
- Dimensions:
- Upper part of the cone : Ø int.250 mm, lower part of the cone : Ø int.25 mm
- Cone length 180 mm, outlet tube Ø 14 mm
- Tube length 70mm
- Total height 250mm.
- Capacity: 3 liters.

Exterior rolled edge which ensures better solidity and avoids deformations.
Interior with non-removable filter, hook on the outside for better grip and suspension.

The flow tube is conical and presents a deformation in the mass allowing a regularity in the flow, to let the air escape. It is narrow and can be used in bottles.

Ref. **4215**

- Upper part of the cone Ø int.150 mm, lower part of the cone : Ø int.25 mm,
- Length of the cone 110 mm, outlet tube Ø 14 mm,
- Length of the tube 60 mm,
- Total height 170 mm.
- Capacity: 0.5 liters.

Ref. **4220**

- Upper part of the cone Ø int.195 mm, lower part of the cone : Ø int.25 mm
- Length of the cone 140 mm, outlet tube Ø 14 mm
- Length of the tube 70 mm
- Total height 210 mm .
- Capacity: 1 liter.
