

Extended Warranty including Equipment Test Pipette Order No.: 84WAP*

Service

Our warranty extension by 12 months gives you optimal protection even after the end of the regular factory warranty. Extended warranty protects you from unexpected repair costs and reliably secures your investment.

One module of every extended warranty offered by Sartorius is a thorough one-time equipment test at the beginning of the extended warranty period. The equipment test ensures continuous and precise operation of your systems and equipment.

Specifications:

- Warranty extension by 12 months to cover equipment damage that was caused by material or manufacturing defects and has not occurred as a result of incorrect or inappropriate use. Within the extended warranty period, Sartorius bears full costs for repair in one of our Sartorius service workshops/repair centers using solely original spare parts
- Thorough one-time equipment testing in one of our calibration laboratories at the beginning of the extended warranty period. The scope comprises:
 - Equipment cleaning
 - Function and leakage test
 - Calibration and adjustment

Excluded Services:

- Calibration certificates
 - Consumables
- are not included and will be invoiced separately according to the services performed.
