

Falcon[®] Pipet Controller

The light, ergonomic, motorized pipet controller is designed for use with glass and plastic serological pipets from 0.5 to 100 mL volume ranges. Conveniently positioned switches change operating modes and speeds quickly to handle different liquid volumes and viscosities. Aspirating and dispensing speed is controlled through the finger triggers. When fully charged, the batteries enable up to 8 hours of continuous use. The large LCD display clearly indicates battery status, pipetting mode, and speed.

The Falcon Pipet Controller is supplied with a two-position charging stand, a universal battery charger, and three batteries. Two 0.2 μ m and two 0.45 μ m hydrophobic polytetrafluoroethylene (PTFE) filters are supplied with the pipet controller. Additional filters are available as standard accessories. The filters, pipet holder, and nose piece are autoclavable.

Features

- Ergonomic design for exceptional comfort
- LCD display for continuous visualization of speed, modes, and battery status
- Easy access to the battery compartment
- Easy maintenance

Ordering Information

Falcon[®] Pipet Controller

VWR Cat. No.	Corning Cat. No.	Description
76451-998	357469	Falcon Pipet Controller, with two 0.2 μm filters and two 0.45 μm filters, two-position charging stand, universal power supply, and set of 3 batteries

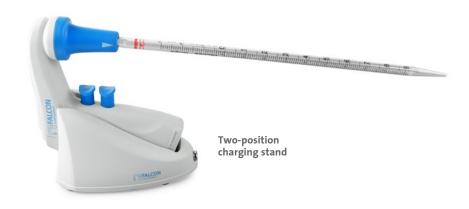

Hydrophobic PTFE filter

Battery cover with wings
