

VWR lab benches and tables

01. ERGONOMIC & FLEXIBLE

02. HEAVY-DUTY STEEL
CONSTRUCTION

VWR benches and tables are designed for real world functionality

VWR, part of Avantor, supports you throughout every phase of furnishing your lab. Our team of experienced sales and support staff is dedicated to supplying original, innovative solutions – on time and within budget.

Our portfolio of lab benches and tables are ergonomically designed to meet the needs of laboratory personnel. There are many possible adjustments and accessories available, all designed for real-world functionality.

All options are height adjustable and can be equipped with casters to create a mobile workstation solution. Available in light neutral-colored frames with either laminate or black phenolic worksurfaces.

Benches and tables ship unassembled. Assembled shipping and installation services available upon request.

- Water systems

VWR REDISHIP

VWR REDISHIP offers you many laboratory furniture items in a matter of days*. If you're ready to renovate your lab at a moment's notice, or if you need to quickly replace lab chairs, tables, carts, shelving, steel casework or fume hoods, VWR REDISHIP is ready when you are.

VWR.COM

We've made it simple for you to find the most comprehensive, up-to-date information about our lab furniture offering on vwr.com, one of the most advanced and customer-focused websites in the industry. You can also access our literature portfolio, installation video, and project photos at our dedicated furniture website, vwr.com/furniture.

BENCH SELECTOR

Design a lab workstation complete with accessories in four easy steps. The configurator walks you through the simple process of selecting a VWR bench and adding accessories to build a lab workstation that best meets your needs. It has never been easier to design and quote a lab workstation! Visit vwr.com/benchselector to discover this tool.

*Most REDISHIP items ship within 72 hours of order. All items are subject to availability at time of order. Large-quantity orders may require longer lead times. 72-hour shipping time is based on immediate credit approval.

VWR® Concept Carts

The VWR Concept Cart is a steel-framed additional worksurface with height adjustment, suitable for many uses. The integrated bottom shelf offers much needed extra storage space and an additional shelf is available as an accessory. Easy and effortless to move around or lock firmly in place by utilizing the castors with brakes. Well suited for use with all the workbenches.

- Powder-coated steel frame, painted light neutral
- Max load 330 lbs.
- Phenolic top included
- Integrated bottom steel shelf
- Height adjustable 25.6"-35.4" with an Allen key
- Four swivel casters (Ø 3.94"), two with brakes
- Additional middle steel shelf available – ordered separately (max load 55lbs.)

Move around as needed; Castors with brakes allow cart to stay firmly in place

VWR® USU utility support uprights

Adjustable cable channels can be configured to suit a range of power, gas, and data needs, while also providing shelving storage above the worksurface. They are attached directly to a top and allow for easy access to utilities without reducing the usable work surface area. Cable channels hide cords and hoses, creating a clean work space. Services can be connected via overhead service carriers, or from underneath the surface through the mounting bracket.

Paint color: light neutral

VWR® Worktable frames

WORKTABLE FRAMES

- VWR® Worktable Frame consists of a pair of legs, rear case, and front rail
- VWR Frames are available in depths: 30" and 36"
- VWR Frames are available in widths: 48", 60", and 72"
- Table frames can be easily equipped with any 12mm stem caster

Steel Thickness:

- Steels used in the construction of the frames are 12, 14, and 16 gauge CRS steel, except as follows:
 - Leg attachment parts: 7 gauge CRS steel
 - Cable rail: 20 gauge CRS steel

Tools needed for C-leg frame assembly:

- 19mm wrench
- 13mm wrench
- 5mm Allen wrench
- #2 Phillips head screwdriver

Tools needed for assembly:

- 10mm wrench
- 8mm Allen wrench

Recommended table top assembly:

- VWR® Laminate Tops assembled with wood screws provided
- VWR® Phenolic Tops can be assembled in two ways:
 - Mechanical fasteners (screws) - Pre-drill a pilot hole in the bottom of the work surface, taking care to keep from penetrating through the top. The pre-drilled hole should be the same length as the screw shaft. The screw should be slightly larger in diameter than the pilot hole. Use a coarse threaded screw, wood or machine. (Important: do not use provided screws for phenolic tops)
 - Adhesive - Use 100% silicon. Apply several "spots" or a continuous bead to the top of the table frame. Position the work surface as centered on the frame and let cure for 12 hours at room temperature.

C-LEG MANUAL

- Leg pair can support 1100 lb load, evenly loaded.
- Height adjustment of VWR® Worktable Frame is 26.62" to 44.34" with table top (3/4") and adjustment glide. Height adjustment is made by adjusting telescoping legs and tightening friction screws on the back and sides of the legs.

C-LEG HANDCRANK

- Pair of legs of crank frame can support 440 lbs dynamic load, and 1100 lbs static load, evenly loaded
- VWR® Frames are available in depths: 30" and 36"
- VWR Frames are available in widths: 48", 60", and 72"
- Height adjustment of crank frame is 27.4" to 41.2" with table top (3/4")
- The crank handle can be installed on the left or right side of the frame. Standard table configuration is right-hand crank.
- Height adjustment change one inch per each full rotation of the crank handle
- The crank folds away under the frame when not in use

C-LEG MOTORIZED

- Leg pair of VWR® Motorized Frame can support a static load of 1100 lbs, evenly loaded on a worktop and a dynamic load of 880 lbs, evenly loaded
- VWR® Frames are available in depths: 30" and 36"
- VWR Frames are available in widths: 48", 60", and 72"
- Height adjustment range of VWR Motorized Frame is 27.80" to 43.55" with table top (3/4") and adjustment glides. Adjustment is made with 2 linear actuators, using an up/down memory desk switch.
- The speed of the frame is .70" / sec without load
- The speed of the frame is .59" / sec with load
- The desk switch can be installed on the front, left, or right side of frame
- The desk switch has multi-position memory system to be able to set the frame to three customer-based heights and up/down buttons for random settings
- All units have soft-start and soft-stop circuitry
- The table can be manually driven over the memory positions
- Silent operation; 45 dB (A) DS/EN ISO 3746
- Capable of operations in ambient temperature 41 to 104°F

4-LEGGED BENCH

- Front and rear components come welded to the legs, saving install time and increasing strength
- Frames are available in 30" depth
- Frames are available in widths: 48", 60", and 72"
- Table frames can be easily equipped with any 12mm stem caster
- Weight capacity: 2000 lbs.

STEEL THICKNESS:

Steel used in the construction of the frames are 12, 14, and 16 gauge CRS steel, except as follows:

- Leg attachment parts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

SLOTTED UPRIGHTS

- Uprights are available in heights: 53.5" and 62.3" (usable height above the work surface is 42.3" and 51.18")
- Depth of the uprights is 2.36"
- Width of the uprights is 1.18"
- Uprights can be attached to each table frame to enable the use of accessories
- Upright module consists of a minimum of 2 uprights, which are installed with the correct spacing for the desired module size (see table)
- Upright modules can easily be extended to create double modules (3 uprights needed)
- Each upright can support loads equal to the maximum load limited by table frame or accessories in use
- For accessories the height adjustment steps are 1.1"
- Steel thickness: Steel used in the construction of the upright is 14 gauge CRS steel in light neutral
