

Returning to the Bench

Recommended list of equipment for individual use

Whether you're keeping precious cultures alive or doing other essential work, stay vigilant about safety. Here's how to restart your lab protecting yourself, your colleagues, and your work from the viral spread.

▶ Stagger lab hours

Sign up for shifts to limit the number of people in the lab. Do laptop work (such as grant writing) from home.

▶ Prioritize hand hygiene

Wash hands with soap and water for at least 20 seconds before and after using gloves. Alternatively, utilize hand sanitizer stations and refill them often.

▶ Have situational awareness

Practice social distancing, and respect personal space. Keep at least 6 feet apart from colleagues.

▶ Wear PPE while cleaning

Use personal protective equipment (PPE) while cleaning. Wipe down reusable PPE (such as safety goggles) afterward cleaning.

▶ Use individual bench top equipment

Consider buying additional equipment to limit using high touch items shared in your lab. Regularly clean and disinfect surfaces, equipment, refrigerator handles, and light switches with EPA-approved disinfectants.
