

Reliable and High-Quality Antibody Supplier

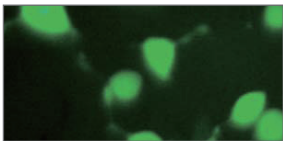

Reliable and well-selected antibodies are among the most effective tools available to researchers when it comes to identifying and locating specific proteins. GenScript provides a broad range of high-quality antibodies that can be applied to all areas of life science research and drug discovery. All antibodies are thoroughly tested to ensure the highest level of purity and quality.

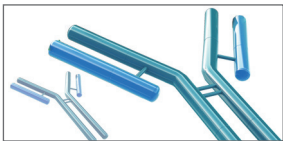

THE™ Elite Antibodies

THE unmistakable, THE irreplaceable, and THE most precise and effective antibodies in the industry

Epitope Tag Antibodies

The most comprehensive tag antibody pool for a variety of immunological applications

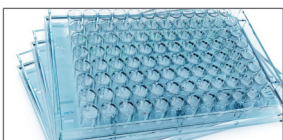

Primary Antibodies

Highly specific monoclonal and polyclonal antibodies, including H1N1 Antibodies, Neuroscience Antibodies, Cytokine and Growth Factor Antibodies, Control Antibodies, Cell Marker Antibodies, and more

Secondary Antibodies

The conjugated secondary antibodies can be generally used for various kinds of immunology analyses and protein assays

IVD Antibodies

High-quality IVD antibody pairs with low cross reactivity against many disease targets for the development of IVD kits
