

## **Instructions for completing End User's Registration for Microbiologics, Inc.**

### **Who can buy Microbiologics products?**

Any laboratory that is equipped to handle biohazard material and a legal entity may purchase these products. The lab must be able to agree to the terms in the Microbiologics End User Agreement. These products are not available for purchase by individuals and will not be shipped to a home, or non-commercial address.

### **Why must customers agree to the end user agreement?**

**Microbiologics Inc.** uses reference organisms under license from the American Type Culture Collection (**ATCC®**) to manufacture products supplied through **VWR**.

**ATCC®** is the premier global biological materials resource and standards organization whose mission focuses on the acquisition, authentication, production, preservation, development, of standard reference microorganisms, cell lines, and other materials.

Therefore, Microbiologics Inc. must obtain an End User Agreement from each customer with their first order to comply with ATCC's licensing. Once a customer has registered, future orders will not require this step unless the customer changes address.
