KNIT SHELL WITH FULL NBR COATING AND NITRILE PALM, A4

Glass washing glove in lab applications that offers cut and puncture resistance

Coated work gloves provide additional protection in high wear high risk areas of the hand. Y9290 features cut-resistant for additional protection. This is fully dipped with a NBR coating and additionally has a sandy nitrile palm for grip. This double coated glove is an excellent source for gripping and provides extra layers of protection against liquids.

- Stainless steel and polyester construction provides cut and abrasion resistance
- Moderate tactile sensitivity
- Latex free
- ANSI Cut Level A4
- ANSI Puncture Level 4
- Available sizes: S-XXL

CUT RESISTANT LINER, A4

Clean-room cut resistant glove

The cut resistant liner glove is a great option for cut resistance and concealing dirt.

The glove can be used as a liner under another glove for an added protection or worn by itself. An ANSI cut level A4 provides excellent cut resistance, as well as being ambidextrous and latex free. M281 is an ideal glove in industries such as critical environment, clean room, and electronics.

- Stainless steel and polyester construction provides cut and abrasion resistance
- Category III for particulates
- Moderate tactile sensitivity
- Latex free
- Ambidextrous
- ANSI Cut Level A4
- Available sizes: S-XL

HIGHLY REUSABLE FULL-FINGER NYLON LINER

Clean-room glove liner

This highly reusable nylon glove is a great option if you are looking for a glove to withstand up to 30 washings without shrinkage. Made with 100% nylon, this liner offers better mobility and comfort. The M555 is packaged in poly bags and is ideal for critical environment, clean room, electronics, and laboratory areas.

- High performance fiber blended with Lycra® for stretch and reusability
- Category II for particulates
- Good tactile sensitivity
- Ambidextrous
- Available sizes: S-XL

80091-142 M114L

SPEC-TEC™ STERILE CUT RESISTANT GLOVE, A1

Sterile glove liner

This unique thin sterile cut resistant glove is constructed of 100% HPPE fiber that provides comfort underneath a disposable glove. An ANSI cut level 1 provides some cut resistance and is individually wrapped in a sterile package. The M102 is an ideal glove in industries such as medical, organ tissue processing, and pharmaceutical.

- 100% HPPE fiber construction
- Excellent tactile sensitivity
- Sterile
- Latex free
- Full-finger
- Ambidextrous
- ANSI Cut Level A1
- Available sizes: S-XL
