Corning® Lambda™ EliteTouch™ Pipettors

Effortless pipetting and reliable results

Corning Lambda EliteTouch pipettors have been engineered to provide the highest levels of comfort, accuracy, and precision. The lightweight construction, contoured handle, and 4-digit counter were designed to ensure comfortable pipetting. All pipettors feature smooth plunger movement and extremely low pipetting forces to reduce wrist strain and fatigue (RSI). Colored pushbuttons (included) can help identify a user or application for sample safety and lower risk of cross-contamination.

◗ Ergonomic handle design is a perfect fit for both the right and left hand

◗ Convenient one-hand volume setting with auto-lock system prevents accidental volume change during work

◗ 4-digit counter provides greater precision and is perfectly positioned for visibility at all times

◗ Single-channel pipettors are compatible with very narrow tubes

◗ Fully autoclavable and UV-resistant for sample protection against contaminations

◗ The multi-channel shafts retract individually for perfect tip loading and easier tip ejection

◗ Unique ejector lever system enables effortless tip ejection

◗ Easy in-lab calibration helps you quickly adjust your pipettor to various liquid types

◗ Individually tested and supplied with a certificate of quality

Starter Kit

Corning Lambda EliteTouch Starter Kit contains 4 variable volume pipettors in the most popular and universal volumes (0.5-10 µL, 2-20 µL, 20-200 µL, and 100-1000 µL), pipet stand for 4 pipettors, 3 racks with tips, and accessories.
