- Precision control of all parameters for repeatability
- Models with infrared CO₂ sensors are self-calibrating, reducing the need for periodic calibration to help ensure repeatability
- Active background contamination control with copper enriched stainless steel interiors that provide passive contamination control and UV light (UV light optional on some models)
- Choice of high heat or H₂O₂ decontamination in 170-liter models
- Two multigas models, MCO-50M | 76480-250 and MCO-170MP | 76383-302, include oxygen control
- Easy to read large full-color touch panel controls on select models
- USB download of critical operating parameters and alarm events on select models
