About R96-300V

The R96-300V round well 'V' bottom plate is a 96 well plate, 14.8mm high, with a two-plate stack height of 27.80mm. The plate has a total volume of 0.36mL with a 'V' shaped well bottom for improved maximum recovery. The plate is used as an alternative on Kingfisher® platforms.

A silicone sealing mat, SM422 is available for the plate.

The plate is manufactured in class 8 cleanroom in polypropylene giving it good chemical resistance and usable temperature range of -80°C to +121°C. It has been developed precisely to conform to the footprint dimensions defined by SLAS/ANSI standards. This guarantees its compatibility with both manual and automated sample handling systems, readers, and microplate washers.
