

BioXp® DNA Amplification Kits

BioXp DNA cloning kits

Telesis Bio's BioXp DNA amplification kits allow you to amplify DNA constructs to transfection-scale quantities and skip tedious bacterial cultures and erratic service provider delivery times.

Leveraging the power of isothermal DNA amplification technology, the cell-free BioXp DNA amplification kits can be leveraged to redefine your DNA amplification workflow starting from a variety of user inputs.

Learn more about the BioXp System

The BioXp platform is designed to improve productivity, reduce turnaround time, increase throughput and scale, enhance quality, and enable complete workflow control for both synthetic DNA and mRNA formats.

The award-winning BioXp 3250 system and the next generation BioXp 9600 accelerate the design-build-test phases of the product development cycle by enabling automated, rapid, high throughput synthesis of genes, clones, variant libraries, and mRNA.
