

# Biotix Tip Eject Reload

Compatible with Biotix xTIP® and Rainin LTS™ tips

Experience convenience and quality while reducing your lab's waste by 30%

This self-aligning reload solution allows you to easily reload your racks without coming into contact with the tips. The rigid plastic covering also shields unused tips from contamination for later use.

- Available only for LTS and xPIPETTE compatible tips.
- Vertically stacked snapcards take up less space on your lab bench.
- Reduces plastic waste by 30% when compared to racked tips.

Pipette tip racks are fully autoclaveable at 121° C after transfer from reload.

**Step 1: Remove the base**

Remove the lower protective rack base.

**Step 2: Align empty rack**

Align and place Tip Eject over your empty Biotix rack.

**Step 3: Push down**

Push down until a “click” is heard, indicating tips are locked into rack.

**Step 4: Replace stack over empty rack base**

Repeat to refill empty racks as needed
