Chemical Grades

- **ACS Grade:** the highest level of purity, these chemicals meet the requirements set by the American Chemical Society Committee on Analytical Reagents.
- **Reagent Analyzed/Reagent Grade:** chemicals of an analytical grade for all general laboratory use, certified to have impurities below specific levels set by the American Chemical Society. Reagent Grade requirements are nearly as stringent as ACS Grade.
- **Lab Grade:** chemicals meeting a minimum purity standard suitable for histology methods, general laboratory applications, and demonstrations that do not require strict quantitative results.
- **Technical/Commercial Grade:** chemicals suitable for general industrial use. They are typically 85–90% pure and rarely used in the laboratory.
