2. WORKROOM AND BASIC OPERATION GUIDELINES

Operate the device in a room where the temperature ranges between 10-40 °C (50–104 °F) and where the relative humidity is below 80%.

Place the balance on a solid surface to ensure stability. To obtain stable and repeatable weighing results, an anti-vibration table is recommended.

Place the balance away from heat sources. Avoid exposing the balance to the sunlight.

Avoid air drafts and air movements at the workstation.

Avoid exposing the balance to a magnetic field.Do not weigh magnetic substances.

Do not place the balance in a hazardous area. Do not weigh explosive materials.

Make sure that the balance is placed on an even surface.

Do not place the balance on an unstable ground exposed to shocks and vibrations.

6. PREPARING FOR WORK

6.1. Balance temperature stabilization time

Prior to switching the device on it is necessary to ensure that it has reached a temperature equal to room temperature.

Balance temperature stabilization time ranges between 1 - 8 hours.

Connect the power adapter to DC connector.

Connect the power adapter to the mains.

To level the balance, turn its feet and keep turning the feet until the air bubble takes the central position.

10. PERIPHERAL DEVICES CONNECTORS

11. DEVICE CLEANING

11.1. General Recommendations

Prior to cleaning, it is necessary to disconnect the balance from the mains.

Use soft cloths made of microfiber, natural fiber or man-made fiber. Avoid using abrasive cloths or cloths that might scratch the surface. Apply the cleans Avoid applying the onto the device.

Apply the cleanser onto the cloth first. Avoid applying the cleanser directly onto the device.

Avoid using cleansers containing chlorine, corrosive chemicals and bleach. Do not use cleansers containing abrasive substances or scouring preparations.

11.2. Plastic components

Prior to cleaning the plastic housing, it is necessary to disassemble weighing pan components (cover, weighing pan, etc.).

Clean plastic components using a solution of water and detergent (liquid soap, dish-washing detergent, glass cleaner, etc.).

11.3. Stainless steel components

Prior to cleaning the stainless steel components, it is necessary to disassemble them first.

Clean stainless steel components using a solution of water and detergent (liquid soap, dish-washing detergent, glass cleaner, etc.). In case of heavy contamination, a mild solution of vinegar or baking soda. can be used.
