WHAT IS HAZMAT?

PIG HazMat Absorbents are specially treated to soak up spills without degrading or reacting to corrosive liquids including:

- Sulfuric acid
- Nitric acid
- Phosphoric acid
- Potassium hydroxide
- Hydrochloric acid
- Hydrofluoric acid
- Sodium hydroxide
- Hydrogen peroxide

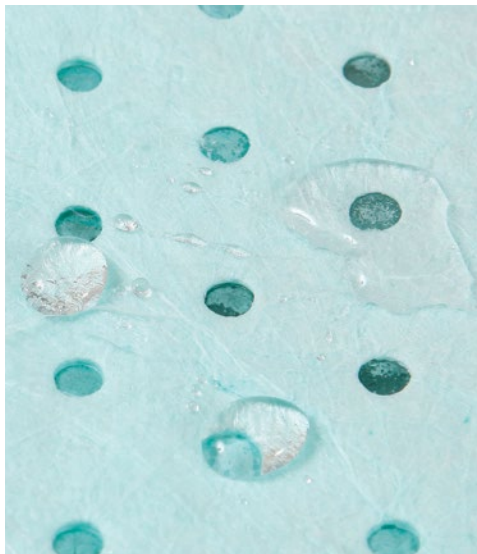

ACID SPILLS? THINK PINK.

PIG HazMat outperforms the competition:

OURS

PIG HazMat completely absorbs 98% sulfuric acid.

THEIRS

Highly concentrated corrosives just puddle on top.

LOOK WHERE CUSTOMERS ARE USING PIG HAZMAT:

- Labs
- Research and development departments
- Surrounding drums in chemical storage areas
- Around dip tanks
- Around battery packs
- Finishing departments
- Boiler rooms

Absorb acids, bases and chemicals with the World's #1 Brand.

STRONGEST MAT ON THE MARKET

Eight layers of 100% polypropylene are thermally bonded to make PIG Mat the strongest mat on the market. It won't rip, tear or fray, even when saturated.

OUTPERFORMS THE COMPETITION

Only PIG HazMat Absorbents are built to handle the worst of the worst. Highly corrosive liquids like 98% sulfuric acid and 30% sodium hydroxide can cause inferior cellulose mats, socks and pillows to degrade or react. But PIG is specially treated to absorb high concentrations of chemicals.

THE CLEAR CHOICE

Pink color is easily distinguishable to ensure workers use the correct mat during a spill emergency.

**SPECIALLY TREATED
TO ABSORB HIGHLY
CORROSIVE LIQUIDS.**

HAZMAT PADS & ROLLS

Specially treated to absorb highly concentrated corrosives.

PERFECT FOR DRIPS AND SPILLS

Line counters and workbenches as a precaution to catch drips when working with acids, bases and unknown liquids or keep mat on hand for quick response to bigger spills.

USE LESS MAT AND SAVE MONEY

Pads and rolls include easy-tear perforations so you can select the perfect length of absorbent mat for your application. Rolls are ideal for covering large areas.

CHOOSE LIGHT OR HEAVYWEIGHT

Select lightweight construction when you're looking for an economical choice for small tasks and cleanups. Choose heavy-weight construction for demanding tasks and large-volume cleanups due to its high durability.

ABSORB ALL THE MESS

Highly absorbent, fine-fiber construction won't leave behind liquids or fiber residue.

PIG® HazMat Pads

Absorb concentrated corrosives.

Ideal for catching drips and soaking up spills, our lightweight PIG HazMat Pads have the same highly absorbent, fine-fiber construction as our heavier weight mats.

HAZMAT SOCKS & PILLOWS

Contain and absorb spreading spills.

DIKES VS SOCKS

Choose socks to be prepared for smaller spills of concentrated chemicals. Have dikes on hand to handle higher-volume spills.

MOLDABLE TO FIT ANY SITUATION

PIG Socks and Dikes can be arranged and overlapped to contain any size spill or wrapped around leaking equipment or machinery.

A SKIN THAT STANDS UP TO CHEMICALS

The polypropylene skin of PIG Socks and Pillows resists chemicals and tearing; reduces dust and holds in liquid, even when saturated

HIGH CAPACITY FOR TIGHT SPACES

High-capacity pillows step up to add even more absorbency during response to spills of chemicals, acids, caustics or unknown liquids. Their size and shape make them perfect to tuck under a big leak or steady drip in a tight spot.

PIG® HazMat Socks & Dikes

Surround and contain spills.

Socks (56620-082 and 46000-772) are excellent for quickly stopping the spread of smaller chemical spills; dikes (56620-720) are excellent for quickly diking and stopping the spread of larger spills. PIG's chemical-resistant socks and dikes won't degrade or cause a dangerous reaction upon contact with corrosive spills

PIG Blue Mat

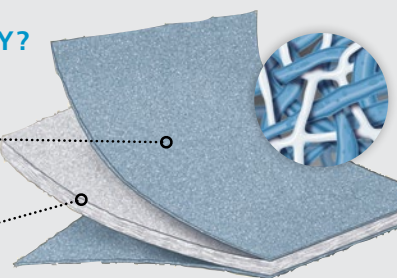

Our most absorbent mat!

The maximum absorbency of our Blue Mat soaks up more so you use less on big spills and high-volume leaks. Consistent construction produces a mat that's free of light spots to absorb liquid evenly for better wicking and retention. It stays together, even when picking up or shifting a fully saturated mat. Blue Mat helps you comply with 29 CFR 1910.22(a)(2) for maintaining floors in a clean, dry condition.

PIG® Blue Socks

Our heaviest sock stops spills.

The heaviest sock we make features extra-dense construction to hug floors and stay in place while containing spills. It's ideal for diking and damming liquids. Fine-grade vermiculite filler quickly absorbs leaks, drips and spills; great for spill response or absorbing equipment leaks. The stitch-bonded, polypropylene skin resists bursting, reduces dust and holds in liquid, even when saturated. Blue Socks can even be air-dried for reuse when soaked with water.
