Hazards identification

Physical stateSolid.OdorOdorless

OSHA/HCS status This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Emergency overview Warning!

CAUSES RESPIRATORY TRACT, EYE AND SKIN IRRITATION. MAY CAUSE ALLERGIC RESPIRATORY REACTION.

CONTAINS MATERIAL WHICH MAY CAUSE DAMAGE TO THE FOLLOWING ORGANS: LUNGS. Avoid contact with skin and clothing. Do not breathe dust. Keep container closed. Use only with

adequate ventilation. Wash thoroughly after handling. Dermal contact. Eye contact. Inhalation. Ingestion.

Potential acute health effects

Eyes Irritating to eyes.
Skin Irritating to skin.

Inhalation Irritating to respiratory system. May cause sensitization by inhalation.

Ingestion No known significant effects or critical hazards.

Potential chronic health effects CARCINOGENIC EFFECTS: Not available.

MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available.

Medical conditions aggravated by

over-exposure

Routes of entry

Repeated skin exposure can produce local skin destruction or dermatitis. Repeated or prolonged exposure to the substance can produce lung damage. Repeated exposure of the eyes to a low level of dust can produce eye irritation. Repeated or prolonged exposure to the substance can produce target

organs damage.

See toxicological information (section 11)

Article Number 28904259-1

Page: 1/4

Validation date 28 September 2006

Composition/information on ingredients

Name CAS number % by weight Exposure limits

Proteinase K 39450-01-6 100

Section 4. First aid measures

Eye contact In case of contact with eyes, rinse immediately with plenty of water. Get medical attention if irritation

occurs.

Skin contactWash with soap and water. Get medical attention if symptoms appear.InhalationIf inhaled, remove to fresh air. Get medical attention if symptoms appear.

Ingestion Do not ingest. If potentially dangerous quantities of this material have been swallowed, call a physician

immediately. Get medical attention if symptoms appear.

Protection of first-aidersNo action shall be taken involving any personal risk or without suitable training. If it is suspected that

fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

Section 5. Fire fighting measures

Flammability of the product

Non-flammable.

Extinguishing media

Suitable

Use an extinguishing agent suitable for the surrounding fire.

Not suitable None known.

Special exposure hazards

No specific hazard.

Special protective equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus

(SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective

equipment.

Environmental precautions Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up If emergency personnel are unavailable, vacuum or carefully scoop up spilled material and place in an

appropriate container for disposal by incineration. Avoid creating dusty conditions and prevent wind

dispersal.

Section 7. Handling and storage

Handling Avoid contact with eyes, skin and clothing. Keep container closed. Use only with adequate ventilation. Do

not breathe dust. Wash thoroughly after handling.

Storage Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure controls, personal protection

Engineering measures Use only with adequate ventilation. If user operations generate dust, fumes, vapor or mist, use process

enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne

contaminants below any recommended or statutory limits.

Personal protection

Hands

Eyes Safety eyewear complying with an approved standard should be used when a risk assessment indicates

this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

Skin Personal protective equipment for the body should be selected based on the task being performed and

the risks involved and should be approved by a specialist before handling this product.

RespiratoryUse a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels,

the hazards of the product and the safe working limits of the selected respirator.

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times

when handling chemical products if a risk assessment indicates this is necessary.

Hygiene measures Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and

using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that

eyewash stations and safety showers are close to the workstation location.

Consult local authorities for acceptable exposure limits.

Article Number 28904259-1 Page: 2/4

Section 9. Physical and chemical properties

Solid. Physical state White. Color Odorless Odor 0% (w/w) Volatility VOC 0 (a/l)

Dispersibility properties See solubility in water.

Solubility Easily soluble in cold water, hot water.

Section 10. Stability and reactivity

Stability and reactivity The product is stable.

Incompatibility with various

substances

Reactive or incompatible with the following materials: oxidizing materials

Will not occur. Hazardous polymerization

Conditions of reactivity Non-flammable in the presence of the following materials or conditions: open flames, sparks and static

discharge, heat, shocks and mechanical impacts, oxidizing materials, reducing materials, combustible

materials, organic materials, metals, acids, alkalis and moisture. Not considered to be a product presenting a risk of explosion.

Section 11. Toxicological information

Chronic effects on humans Contains material which may cause damage to the following organs: lungs.

Other toxic effects on humans Hazardous in case of skin contact (irritant), of eye contact (irritant), of inhalation (lung irritant, lung

sensitizer)

Special remarks on chronic effects

on humans Specific effects To the best of our knowledge, the toxicological properties of this substance have not been thoroughly

investigated. (Proteinase K)

No known significant effects or critical hazards. Carcinogenic effects Mutagenic effects No known significant effects or critical hazards. No known significant effects or critical hazards.

Teratogenicity / Reproduction

toxicity Target organs

Contains material which may cause damage to the following organs: lungs.

Sensitization

No known significant effects or critical hazards. Ingestion

Irritating to respiratory system. May cause sensitization by inhalation. Inhalation

Eyes Irritating to eyes. Irritating to skin. Skin

Section 12. Ecological information

No known significant effects or critical hazards **Environmental precautions**

Section 13. Disposal considerations

The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled Waste disposal

material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental

protection and waste disposal legislation and any regional local authority requirements.

Code: Not classified RCRA classification

Consult your local or regional authorities.

Faint odor. Irritant. Odor

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). OSHA/HCS status

Emergency overview

CAUSES EYE AND SKIN IRRITATION. MAY BE HARMFUL IF SWALLOWED.

CONTAINS MATERIAL WHICH MAY CAUSE DAMAGE TO THE FOLLOWING ORGANS: CENTRAL NERVOUS

Do not ingest. Avoid contact with skin and clothing. Wash thoroughly after handling.

Routes of entry Dermal contact. Eye contact.

Potential acute health effects

Irritating to eyes. Eves Irritating to skin.

No known significant effects or critical hazards. Inhalation

Harmful if swallowed. Ingestion

Potential chronic health effects **CARCINOGENIC EFFECTS**: Not available. **MUTAGENIC EFFECTS**: Not available.

TERATOGENIC EFFECTS: Not available.

Medical conditions aggravated by

Repeated skin exposure can produce local skin destruction or dermatitis. Repeated or prolonged contact with spray or mist may produce chronic eye irritation and severe skin irritation. Repeated or prolonged

exposure to the substance can produce target organs damage.

See toxicological information (section 11)

over-exposure

3. Composition/information on ingredients

Name CAS number % by weight Exposure limits

Guanidinium chloride 50-01-1 66.87

Section 4. First aid measures

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and

lower eyelids. Check for and remove any contact lenses. Get medical attention.

Skin contact Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical

attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Move exposed person to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be

dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if symptoms occur. If unconscious, place in recovery position and get medical attention immediately.

Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person

warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately.

Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Protection of first-aidersNo action shall be taken involving any personal risk or without suitable training.

Section 5. Fire fighting measures

Flammability of the product

Extinguishing media

Non-flammable.

Suitable Use an extinguishing agent suitable for the surrounding fire.

Not suitable None known.

Special exposure hazards

No specific hazard.

Special protective equipment for

fire-fighters

Inhalation

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus

(SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective

equipment.

Environmental precautions Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may

be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain material to ensure runoff

does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and storage

Handling Do not ingest. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.

Storage Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure controls, personal protection

Engineering measures No special ventilation requirements. Good general ventilation should be sufficient to control airborne

levels. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory

limits.

Personal protection

Hands

Eyes Safety eyewear complying with an approved standard should be used when a risk assessment indicates

this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

Skin Personal protective equipment for the body should be selected based on the task being performed and

the risks involved and should be approved by a specialist before handling this product.

RespiratoryUse a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated

exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times

when handling chemical products if a risk assessment indicates this is necessary.

Hygiene measures Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and

using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Section 9. Physical and chemical properties

Physical stateLiquid.ColorColorless.OdorFaint odor. Irritant.

pH 7 (Conc. (% w/w): 100) [Neutral.]

Boiling/condensation point The lowest known value is 100°C (212°F) (water). Weighted average: 101.56°C (214.8°F)

Melting/freezing pointMay start to solidify at 0°C (32°F) based on data for: water.Critical temperatureThe lowest known value is 374.3°C (705.7°F) (water).Relative densityThe only known value is 1.11 (Water = 1) (Tween 20).

Vapor pressure The highest known value is 3.2 kPa (23.8 mm Hg) (at 20°C) (water). Weighted average: 2.7 kPa (20.25 mm

Hg) (at 20°C)

Evaporation rate0.36 (water) compared with Butyl acetate. **Dispersibility properties**See solubility in water, methanol, acetone.

Solubility Easily soluble in cold water, hot water, methanol, acetone.

Section 10. Stability and reactivity

Stability and reactivity The product is stable.

Incompatibility with various

substances

Reactive or incompatible with the following materials: oxidizing materials and reducing materials.

Slightly reactive or incompatible with the following materials: moisture.

Non-reactive or compatible with the following materials: combustible materials, organic materials, metals,

acids and alkalis

Hazardous decomposition

products

These products are halogenated compounds, hydrogen chloride.

Hazardous polymerization Will not occur.

Conditions of reactivity

Non-flammable in the presence of the following materials or conditions: open flames, sparks and static

discharge, heat, shocks and mechanical impacts, oxidizing materials, reducing materials, combustible

materials, organic materials, metals, acids, alkalis and moisture.

Non-explosive in the presence of the following materials or conditions: open flames, sparks and static discharge, heat, shocks and mechanical impacts, oxidizing materials, reducing materials, combustible

materials, organic materials, metals, acids, alkalis and moisture.
