Motic®

MORE THAN MICROSCOPY

MotiConnect App
## View, capture and store your images in the blink of an eye

With mobile devices, tablets and computers being such a big part of our personal and work lives, we think that Digital Microscopy should not be an exception to this trend. And for this reason, we have created the MotiConnect App, which works with Mac, Windows and Linux OS as well as with iOS and Android.

MotiConnect allows you to view live camera streams, capture and measure, annotate and share your microscope images, all through a user-friendly interface. This application is popular amongst students, professors and professionals alike as it is intuitive and easy to use, even to technology novices.
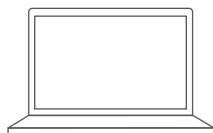

Available for:

Mobiles
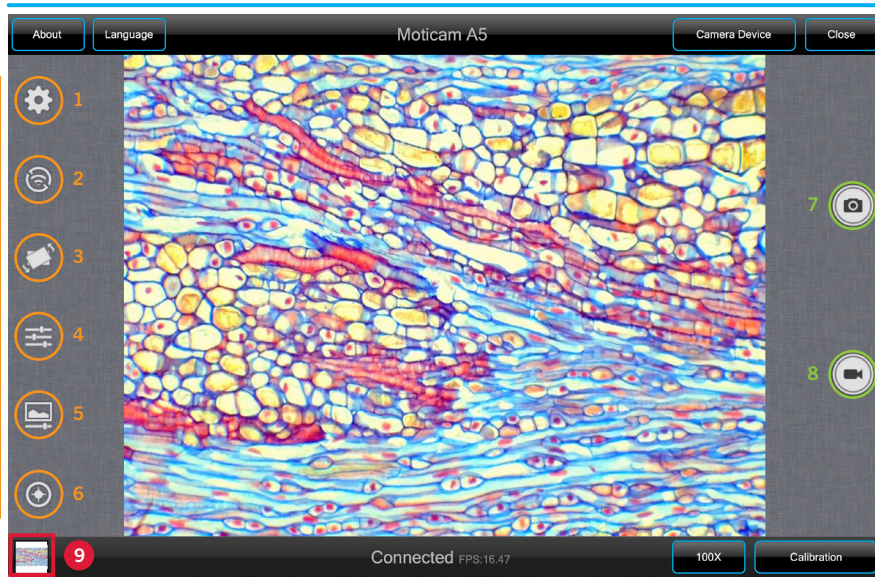

Tablets

Computers

Get our Free App:

iOS devices **Download on the App Store**

Android devices **GET IT ON Google Play**

Mac, Windows and Linux computers: https://ws.motic.com/mo1/moticonnect
