## VWR® PCR AND qPCR TUBE STRIPS & CAPS

- Tube strips with individually-attached caps
- Tube strips with hinged caps
- Tube strips with separate cap strips
- Cap strips
- Tube strips
- Qiagen® Rotor-Gene® tube strips and caps
- Individual tubes

Pages 3-5

## VWR® 96-WELL PCR AND qPCR PLATES

- 96-well flat plates (no skirt)
- 96-well half-skirted plates
- 96- and 384-well full-skirted plates
- PCR accessories

Pages 6-8

# Ideal for all PCR protocols

VWR® 0.1mL (Low Profile) and 0.2mL Tubes & Caps are made from polypropylene and are compatible with most popular thermal cyclers.

- Smooth, thin, uniform walls for accurate thermal transfer and sample recovery
- Caps fit precisely to ensure a positive seal to prevent evaporation
- Certified free of RNase, DNase, and human DNA (lot-by-lot certificates available)

Single interwell linkage makes strips easy to split into smaller sections. (53509-304, 93001-118)

White tubes offer enhanced fluorescence reflection for qPCR. (89401-570)

Three-point interwell linkages make strips more rigid, decreasing the chance of spillage. (93001-120, 89401-570)

White tubes with clear flat caps create the perfect environment for consistent, reliable qPCR performance. (89401-570)

**VWR® qPCR QIAGEN® ROTOR-GENE® TUBE STRIPS AND CAPS**

These 4-well, ultra-clear reaction strips fit the Qiagen® Rotor-Gene®.

- Certified free of RNase, DNase, and human DNA (lot-by-lot certificates available)
- Polypropylene
- 250 4-well strips and 250 separate strip caps per package

**VWR® INDIVIDUAL PCR TUBES WITH CAPS**

Ideal for all PCR protocols, these 0.2 mL tubes and caps are made from polypropylene and are compatible with most popular thermal cyclers.

- Polypropylene construction
- Chemically inert

Tubes and caps feature smooth, thin, uniform walls for accurate thermal transfer. Certified free of RNase, DNase, and human DNA (lot-by-lot certificates available). Tubes are available with bubble-top or flat-top caps, both of which fit precisely to ensure a positive, contamination-free environment.

## PCR and qPCR Plates

- Smooth, thin, uniform well walls ensure accurate thermal transfer
- Wells are slightly raised to facilitate sealing with strip caps (p. 4), mats (p. 8), films, and foil
- Printed alphanumeric labeling simplifies plate and sample identification
- Polypropylene plates are certified free of RNase, DNase, and human DNA (lot-by-lot certificates available)

Custom bar-coding available on semi-skirted and full-skirted plates.

Raised wells ensure optimal sealing to prevent evaporation.

High-contrast, black alphanumeric indexing.

Inert mat helps avoid sample evaporation by creating a tight seal.

VWR® PCR THERMAL RACK

Benchtop rack allows frozen PCR samples to be worked with for up to four hours at 0°C (32°F).

- Refreezable rack holds 0.2mL tubes, strips, and plates
- As the rack warms, the color of the chilling surface changes from purple to pink to indicate when the samples need to be returned to the freezer

Rack is constructed of polypropylene and polygel and includes a snap-on lid.
