BRAND Product Packaging

Dear Customer

Using recycled material for product packaging whilst ensuring the high visual and functional quality of the packaging is a contribution to responsible manufacturing at BRAND. We hereby like to confirm the proportion of recycled material used in the production of BRAND packaging material:

Hansaboard: 300 – 550 g/m²

Recycled material: 92.70 – 96.00 % (including post industrial waste and post consumer waste)

The material is free of halogenated organic materials.

The packing material mentioned above is used for the following products (amongst others):

accu-jet® pro
Transferpette® S
Transferpette® electronic
Titrette®

We hope this information is helpful to you. Please feel free to contact us again in case of any queries.
