

Safeguarding the future of research: trusted sample management solutions

Solve the complexities of your sample management needs

In the dynamic landscape of scientific discovery, precision and reliability are paramount. As part of our commitment to excellence, we understand that:

- We are the custodians of groundbreaking research
- Every sample holds the potential to revolutionize medicine, advance therapies and improve lives
- Safeguarding your critical research assets with meticulous care, end to end, is paramount

From collection and operations to logistics and storage, Avantor's comprehensive solutions cover key stages of the sample lifecycle. With transparency, quality and security at the forefront, we empower you to focus on what truly matters: advancing science and driving meaningful outcomes.

MITIGATE RISK WITH A CONSOLIDATED SAMPLE MANAGEMENT SYSTEM

Managing samples in an increasingly global clinical trial landscape is complex and time-consuming. Coordinating the logistics of custom kits, sample collection and storage can waste valuable time, resources and facility space that is better spent on critical lab work, particularly when juggling separate vendors. Yet handing over control of these invaluable assets can seem just as daunting.

Fortunately, there is a better option than struggling to meet these operational challenges. Our unparalleled track record of reliably handling hundreds and thousands of samples allows you to redirect your focus toward scientifically valuable, regulatory compliant research and patient outcomes.

Why consolidate your sample assets with Avantor?

- **Operational efficiency.** Reduce the complexities of sample management, for both the logistics of managing multiple vendors in multiple countries, and for the end user in tracking and finding kits and samples.
- **Data accuracy and availability.** Our proprietary lab systems integrate with your CRM and LIMS platforms, ensuring complete visibility of your kits and samples for faster turnaround and reduced risk of error.
- **Compliance and auditing.** A centralized partner like Avantor assures compliance with various regulations and protocols worldwide, streamlining documentation, record-keeping and sample indexing.
- **Improved financial and resource management.** A single partner simplifies procurement and budgeting, not to mention the reduced waste of time, talent, equipment and facility space — translating into real cost savings.
- **Subject matter experts.** Pulling it all together is a dedicated team of experts who can tailor a flexible sample management solution that aligns with your research objectives and offer on the ground support.

AVOID COSTLY DELAYS WITH RELIABLE SAMPLE COLLECTION

A full-service partner can better advance your research study objectives than a stand-alone kitting provider. With the global reach of clinical trials of today, you need reliable, customized sample collection kits with inventory tracking, visibility and data-driven insights to streamline your operations.

Avantor has over two decades of experience in direct distribution for hundreds of laboratories in FDA-registered, cGMP-compliant facilities. We understand the complexities — and the high stakes — of regulated kit production across all clinical disciplines and scales. Our full suite of solutions includes customized kitting, distribution and supply chain support services across a global network.

From ordering, tracking, and tracing using our proprietary Passport® system, to freight management and logistics support, our seamless kitting solutions provide the consistency you need with a holistic provider you can trust. Our proven sample collection services protect the integrity of your samples, which in turn supports the efficacy of your work.

Avantor Services helps scientific organizations solve complex challenges, resulting in improved productivity, increased efficiency, and accelerated innovation.

Are your scientific resources being wasted on non-research activities? Consolidate and save! Contact us for more information.

PROTECT VITAL RESEARCH ASSETS WITH CUSTOMIZED & CONSOLIDATED STORAGE

Meticulous care of clinical and biological samples is critical to the validity of your research and regulatory compliance. Fulfilling the logistical demands of sample archiving and management can be complicated and costly — requiring considerable facility space, consistent equipment maintenance and a committed team to ensure the safety and preservation of these precious yet vulnerable assets.

Consolidating your sample management with Avantor is a great way to leverage operational efficiencies that translate into real cost and space savings. We tailor a solution to your exact specifications, including choice of onsite, offsite or hybrid storage, accurate indexing, and stringent QA and regulatory standards. Our experienced team serves as a seamless extension of your own facility — reducing risk by consolidating your irreplaceable sample inventories in secure, temperature-diverse facilities for invaluable peace of mind.

In addition, Avantor's proprietary web portal system, LabTrak®, offers full visibility with flexible material indexing and instant digital access. Specialized logistics services provide 24-hour, on-demand sample retrieval, tracked in real time, backed by industry-leading support.

TRANSFORM APPREHENSION INTO ASSURANCE

With over 40 years of experience, Avantor has safeguarded more than 100 million critical research assets and never failed to return one. This impeccable record speaks volumes, and our promise is simple: your research assets are as valuable to us as they are to you.
