Phase Overview

Founded on state-of-the-art solid core technology and utilizing vast experience in phase bonding and packing, Accucore UHPLC and HPLC columns provide a robust chromatography solution to enhance laboratory workflow and efficiency. Available in a wide range of stationary phase selectivities and compatible with almost any instrument, these columns provide an excellent return on investment.

Thermo Scientific Accucore Vanquish UHPLC Columns

Using 1.5 µm solid core particles, Thermo Scientific™ Accucore™ Vanquish™ UHPLC columns allow UHPLC users to enjoy performance benefits over columns packed with conventional sub-2 µm fully porous particles.

Accucore HPLC Columns

Containing solid core particles, which are engineered to a diameter of 2.6 µm and a very narrow particle size distribution. Accucore HPLC columns allow high speed, high resolution separations.

Accucore HPLC Columns for Biomolecules

The range of Accucore HPLC columns packed with 150 Å pore diameter particles allows biomolecule separations to benefit from the superb resolution and high speed enabled by solid core technology.

Accucore XL HPLC Columns

Using 4 µm solid core particles, Accucore XL HPLC columns allow users of conventional HPLC methods to enjoy performance far beyond that of columns packed with 5 µm, 4 µm or even 3 µm fully porous particles.
