

Corning® LSE™ Mini Incubator

Compact Incubator with Uniform Heating

Corning's compact mini incubator is designed for personal use, small laboratories, and classrooms. The units feature a broad temperature range to meet a variety of small sample applications.

Multiple heating elements provide even heating uniformity, and the hydraulic thermostat ensures temperature stability within the chamber. A thermometer port in the top of the unit allows the user to monitor temperatures. The large window in the door gives a clear view of the contents which can include up to 48 standard Petri dishes or 28 standard microplates.

One shelf is included and can be adjusted to three different levels; additional shelves can be purchased to increase storage capacity. Shelves can be placed at two points within the corrosion-resistant chamber and at the bottom of the incubator. If you intend to place samples on the bottom of the chamber, install the shelf so that it sits edge down on the chamber bottom thus creating an air gap between the chamber bottom and your samples.

Ordering Information

Corning LSE Mini Incubator and Accessories

VWR Cat. No.	Corning Cat. No.	Description	Qty
76404-716	6800	Corning LSE mini incubator, 115V	1
