Prior to cleaning, wash and dry your hands and then put on new gloves

### Wiping

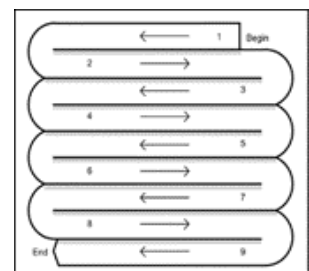

Use one wipe per surface to prevent cross contamination.

Wiping should be done in a pull & lift fashion with overlapping strokes. This can be done horizontally or vertical as shown below. Following this step is critical in removing contamination instead of spreading in circles.

### Mopping

With mops a modified figure 8 (S-Method), Right to left, then left to right, with overlapping strokes

When the mop and wipe begin to dry out it's time to replace with a new one.
