

MDF-DC700VXC-PA | 75788-512

# Twin Guard®

-86°C Ultra-Low Temperature Chest Freezer

25.3 cu.ft. | 715 L

MDF-DC700VXC-PA | 75788-512

The patented TwinGuard -86°C chest freezer is powered by a unique concept of two independent auto-cascade cooling circuits that work together, both independently and concurrently, to provide continuity in stored product protection over a range of real world conditions.

# Ultimate Sample Protection

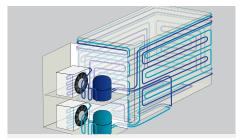

The dual cooling system offers the highest level of sample protection through the use of two independent refrigeration systems that maintain -86°C temperature. The two circuits work together for fast temperature recovery, while the secondary system keeps the temperature at -70°C if a service event occurs.

# **Efficient Sample Storage**

The use of VIP® Plus cabinet and lid insulation, combined with a newly designed refrigeration system layout ensures a capacity of 520, 2" storage boxes, utilizing less floor space than competitive units.

# Security Control and Monitoring

A color LCD touchscreen allows full user control while the USB port makes transferring logged data to a PC convenient. All performance attributes are displayed and an internal time/temperature log is expressed in graphic form.

## Valuable Sample Storage

With two independent systems, each sustaining ultra-low temperatures, your samples remain safe. Optional CO<sub>2</sub> backup provides an extra layer of protection.

#### **Predictive Maintenance**

Performance monitoring ensures the freezer is operating within specification. This protects the compressors and condenser fans. External stress on the compressors or fans, due to ambient temperature abnormality or excess load, is displayed for immediate notification.

#### Ease of Use

The display panel includes a comprehensive alarm system with audible and visual warnings, unit diagnostics and running temperature log.

## MDF-DC700VXC-PA | 75788-512

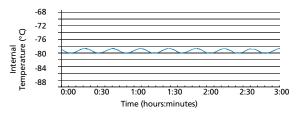

Model MDF-DC700VXC-PA | 75788-512

## **Improved Temperature Performance**

The TwinGuard -86°C chest freezer design provides optimal temperature stability and uniformity during routine lid openings, minimizing the loss of cold air even when the freezer lid is open.

### **Temperature Uniformity Data:**

-80°C setpoint at 20°C ambient temperature, empty freezer

Typical uniformity profile. For detailed information on actual data points contact PHC Corporation of North America.

#### **Dimensions**

Unit : inch | mm
