

Digital Solutions

Reinvent the way you manage inventory with Inventory Manager

Avantor's Inventory Manager

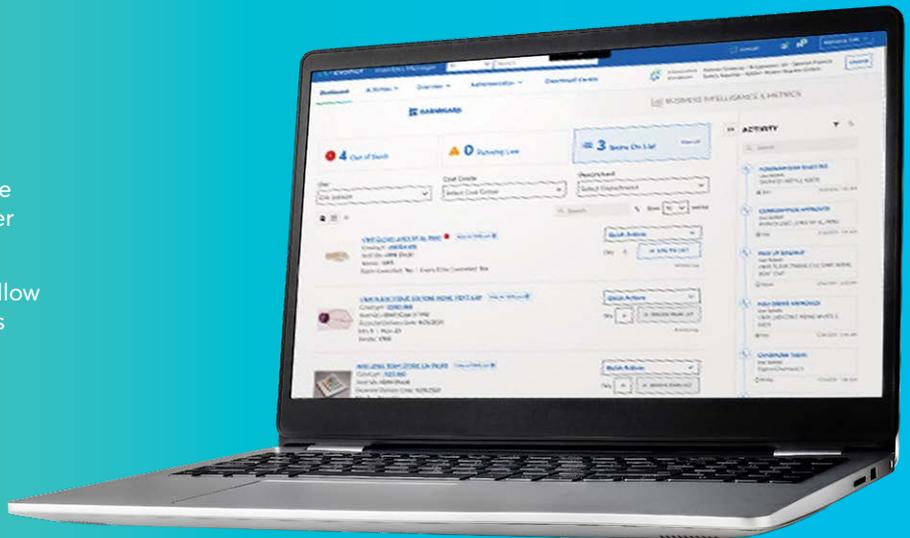

1

Ease of use and enhanced visibility

What can Inventory Manager do for your lab?

Inventory Manager's cloud-based functionality, accessible from any browser and a variety of device types, streamlines insights and personalizes the user experience with:

- Fully integrated procurement workflows which allow for the ordering tracking and tracing of products
- Customizable intuitive dashboard functionality, minimizing required support
- Individual notifications and messages
- Multi-lingual capability, currently supporting 17 languages
- Desktop and mobile app (Android and iOS)
- Enterprise-level information anytime, anywhere

2

Data-based, real-time reporting

Simplifying your lab's inventory management begins with complete visibility into what your lab needs – and what it doesn't – to minimize waste and manage spend. Inventory Manager's robust platform easily integrates into your lab's procurement systems to provide:

- Metrics at the SKU level, addressing overhead, usage, turns and no-move stock
- Lab location or research unit-specific data on consumption, replenishment, product expiration dates and repeat buys
- Activity log to track transactions
- Customized reporting modes – scheduled or ad hoc – so you can access critical data anytime, anywhere

3

One-stop and on-demand replenishment

Inventory Manager provides the supply chain customization your research demands including:

- Supporting thousands of products globally including our channel brand VWR product offering
- Flexible vendor agnostic approach which also allows you to order through any supplier of your choice

Inventory manager offers two levels of support **IM Standard** and **IM Enterprise**.

Enhance your order and supply chain by combining vwr.com with IM standard

IM Standard has been created to support smaller lab operations which require a self-service digital support system that increases efficiency in the lab procurement and the inventory management.

Unlimited scalability, tailored processes and reporting to meet your every need

IM Enterprise can support larger lab operations with multiple locations, points-of-use and extensive procurement flows who need to know where their supplies and materials are and demand a high level of integration and automation to ensure time can be focused on revenue generating lab work.

Inventory Manager Standard

Improve visibility into your lab supplies with standard Inventory Manager's integrated digital stockroom.

-  Up to 5 users
-  Up to 5 suppliers
-  Basic reporting and audit log
-  Integration with inventory barcode scanner technology

Inventory Manager Enterprise

Get enterprise-level insight and control of supplies as well as improve collaboration on key lab management tasks with our online inventory software.

-  Unlimited users
-  Unlimited suppliers (vendor agnostic)
-  Visibility into lab supplies consumption and cost tracking to end-user level
-  Automated ordering, receiving, reporting and notifications
-  Integration with your mobile scanning, lab inventory management system (LMS) and electronic lab notebooks (ELNs)
