

The Clean Facility

Innovative Cleaning Solutions for **Laboratory,**
LAR, Production and **Cleanroom** Environments

Vileda Professional® is the leading global manufacturer of innovative cleaning and disinfecting systems used in Controlled Environments, Cleanrooms, Pharmaceutical, BioPharm, Medical Device, Electronics, Industrial, Medical, Food Service, Laboratories, Production Areas, Lab Animal Research, Government, Semiconductor and Biotechnology. Facilities that are manufacturing products and adopting a contamination control program now have a resource. Vileda Professional® offers solutions that help you clean faster and more effectively while lowering your total costs! With Vileda Professional®'s investments in Research and Development, we are dedicated to providing you the most innovative and effective cleaning solutions available in the industry.

Vileda Professional® is a member of the Freudenberg Group. Founded in 1849, the Freudenberg Group today is a diversified family-owned company with market leading activities in non-wovens, system and tool engineering, flooring and many other areas. The Freudenberg Group operates in 60 countries and employs more than 40,000 people. Vileda Professional® is working in 20 of those countries with over 300 employees. Vileda Professional® is a strong partner wherever you are!

Vileda Professional® North America is headquartered in Aurora, IL which is a suburb west of Chicago. Our LEED™ Certified manufacturing facility was built in 2009, and is more than 500,000 sq ft. The Aurora facility is the manufacturing home to O'Cedar®, Vileda®, Vileda Professional®, Roll-O-Matic®, and other popular brands.

The Clean Facility

Vileda Professional® is a global leader in manufacturing innovative systems used to clean the entire facility, in all markets, including: laboratories, production areas, lab animal research and cleanroom environments.

Facilities that are manufacturing products and are adopting a contamination control program now have a complete resource!

Every item in this catalog references back to this facility diagram. Fold out this page, and utilize it when looking for your innovative solution!

Suggested application areas for items found in this catalog.

ISO Class 5 cleanroom

(Fed. Std. 209E rating is Class 100).

Has no more than 3,520 particles per cubic meter equal to and larger than 0.5 microns.

ISO Class 6 cleanroom

(Fed. Std. 209E rating is Class 1,000).

Has no more than 35,200 particles per cubic meter equal to and larger than 0.5 microns.

ISO Class 7 cleanroom

(Fed. Std. 209E rating is Class 10,000).

Has no more than 352,000 particles per cubic meter equal to and larger than 0.5 microns.

ISO Class 8 cleanroom

(Fed. Std. 209E rating is Class 100,000).

Has no more than 3,520,000 particles per cubic meter equal to and larger than 0.5 microns.

Lab Animal Research Facility

May be ISO classified. In most cases it is classified as a controlled environment. This is an environment in which parameters, such as particulate, microbial contamination, light, temperature, relative humidity and sometimes room pressure, are controlled.

Production Facility

May be ISO classified. It may be classified as a controlled environment. "The Clean Production Facility" is a growing trend in the marketplace.

Laboratory

May be ISO classified. It may be classified as a controlled environment. In most cases controlling particulate and microbial contamination is of the highest concerns.

Systems and innovations that outperform the competition.

CE Duo Mops

The less time you spend on cleanroom cleaning, the less you interfere with keeping the core business running. The unique Duo mop concept is the perfect answer to meet the high demands for effective cleaning and disinfection of cleanroom and controlled environments.

EvoControl CE Wipes

Maximize contamination control with EvoControl Microfiber Cleanroom wipes. Remove contaminants in one swipe, leaving the surface clean and free of residual contamination. This is critical for wiping spills and removing particles from the surface.

Compact bucket system

From a cost and functionality point of view, cleanrooms are decreasing in size, affecting the areas to be cleaned as well as the storage rooms for the cleaning equipment. The solution is the new cleanroom bucket system concept- maximum performance with minimum footprint.

Roll-O-Matic®

The self-wringing cleanroom mop! The Vileda Professional® Stainless Steel and Aluminum Extendable Roll-O-Matic® mops are the best choice when seeking one mop to apply disinfectant, clean surfaces or absorb spills in all production and controlled environments.

NanoTech Micro

Remove and kill bacteria! Not only does it wipe away bacteria, it even kills it as Nanoparticles of silver are embedded in the microfiber structure and silver kills bacteria when in direct contact. Due to the embedding of the silver particles they last for several hundred washing cycles.

SpillEx

In cleanrooms and controlled environments, spills create slip hazards and are not easily removed. Spills usually require a bulky mop system or a large number of expensive wipes that may not absorb well. SpillEx is the ideal problem solver where you need to absorb spillages.

Duo Mops for Cleanroom Cleaning

Two sides-Half the effort!

The less time you spend on cleanroom cleaning, the less you interfere with keeping the core business running. The unique Duo mop concept is the perfect answer to meet the high demands for effective cleaning and disinfection of cleanroom and controlled environments. It is faster, easier and twice as efficient as traditional methods. The Duo mops allow you to achieve your contact time requirements for common disinfectants, and still reach an excellent cleaning performance with up to 99.99% bacteria removal*. Quite simply, the CleanTech and SanTech Duo mops form the most efficient and reliable cleaning concept in the market for contamination control.

Nothing beats microfiber

When it comes to cleaning performance and contamination control, microfiber is the name of the game! The unique and patented composition removes and holds particulates from the surface, plus it has up to 99.99% bacteria removal.

Unbeatable speed and ergonomics

The Duo mop concept allows you to clean twice the area with the same mop head. It saves you 50% of unnecessary walking, dipping and wringing – meaning you save time, increase speed of cleaning and improve ergonomics. You change mop sides by simply flipping the frame over, which means several advantages versus single sided mops:

- 100% more floor coverage
- 50% less dipping and wringing into the bucket
- ±50% less mop changes compared to single sided mops
- ±40% less mops to purchase for cleaning the same area

*Validated by external institute BMA

CleanTech Duo Microfiber Laminated Mop

- Microfiber laminated cleanroom foam for cleaning/disinfecting floors, walls and ceilings
- Adhesive-free lamination techniques are used to prevent additional contamination to your products
- Designed for use in cleanrooms up to class ISO 5/GMP A & B/FED209D Class 100
- Excellent microfiber cleaning results have been independently proven bacteria reduction of 99.997%
- Suitable for bucket and pre-prepared method
- Manufactured and sterilized in the USA **Sterile**
- Validated to 10^{-6} SAL per ISO 11137 **Sterile**
- Individually double bagged with Lot # and Indicator Dot on each package **Sterile**
- Certificate of Sterility available upon request with each shipment **Sterile**

Roll-O-Matic®

The self-wringing cleanroom mop!

The Vileda Professional® Stainless Steel and Aluminum Extendable Roll-O-Matic® mops are the best choice when seeking one mop to apply disinfectant, clean surfaces or absorb spills in all production and controlled environments. These Stainless Steel Roll-O-Matic® mops are manufactured to resist repeated autoclave cycles and continued exposure to the common chemicals and disinfectants used in the controlled environment marketplace.

Perfect for use with the most popular “Pull and Lift” technique.

The straight head design allows user to flip the mop head after a specific number of strokes for extended use between wrings.

The Vileda Professional® Roll-O-Matic® sponge mop refills are manufactured in the USA.

The new “Advanced Technology” foam is manufactured specifically for the controlled environment industry allowing 25% more liquid absorption and two times more liquid release than competing foams. Each refill is completely autoclavable, resistant to gamma and ETO sterilization as well as individually packaged and lot number controlled. All Vileda Professional® brand refills are ideal for use with the “Pull and Lift” technique most commonly used in controlled environments.

Roll-O-Matic® Original Stainless Steel Sponge Roller Mop

- Original (6210 & 6214) Stainless Steel Cleanroom Roll-O-Matic® Sponge Roller Mop in a 72" length for high walls and ceilings
- Entire mop handle is completely autoclavable at the most common autoclave cycles
- Cap is stainless steel and completely sealed
- Straight handle allows user to properly use the pull-and-lift technique with both sides of the mop
- Perfect for use on walls, floors and ceilings

VWR Cat. No.	Description	Size	Case	Application
94002-800	10" Stainless Steel ROM Cleanroom Mop, 48" long (6210)	10 x 48 in	1	5 LR PR LB

89092-938	14" Stainless Steel ROM Cleanroom Mop, 72" long (Sponge not included)	14 x 72 in	2	5 LR PR LB

Roll-O-Matic® Original Galvanized Steel Sponge Roller Mop

- Original (4110 & 4114) Galvanized Steel Roll-O-Matic® Sponge Roller Mop
- Extremely lightweight
- Straight handle allows user to properly use the pull-and-lift technique with both sides of the mop
- Perfect for use especially on walls and ceilings. Also commonly used on floors
- Handle length is 48"

VWR Cat. No.	Description	Size	Case	Application
68400-490	10" ROM Sponge Roller Mop (4110)	10 x 48 in	6	7 LR PR LB
68400-492	14" ROM Sponge Roller Mop (4114)	14 x 48 in	6	7 LR PR LB

Roll-O-Matic® Cleanroom Sponge Roller Mop with Aluminum Extendable Handle

- Colored tabs (blue, red, green and yellow) incorporated into the top of the handle allow for color coding of cleaning equipment
- Ergonomic grip reduces work fatigue
- Handle extends easily with turn of wrist from 58.5" to 76.25"
- Entire mop handle is completely autoclavable at the most common autoclave cycles
- Available in 10" and 14" wide versions
- Straight handle allows user to properly use the pull-and-lift technique with both sides of the mop
- Perfect for use on walls, floors and ceilings

VWR Cat. No.	Description	Size	Case	Application

Roll-O-Matic® Original Sponge Refill

- Original refills have been the standard in the professional and controlled environment industry for well over 30 years
- For use in all Roll-O-Matic® applications and fully autoclavable
- Manufactured and sterilized in the USA **Sterile**
- Validated to 10⁻⁶ SAL per ISO 11137 **Sterile**
- Individually double bagged with Lot # and Indicator Dot on each package **Sterile**
- Certificate of Sterility available upon request with each shipment **Sterile**

VWR® Collection "Universal" Sponge Refill

- Perfect for general use within all controlled environments
- Absorb spills, clean particles and apply disinfectant
- Autoclavable
- Manufactured and sterilized in the USA **Sterile**
- Validated to 10⁻⁶ SAL per ISO 11137 **Sterile**
- Individually double bagged with Lot # and Indicator Dot on each package **Sterile**
- Certificate of Sterility available upon request with each shipment **Sterile**

VWR® Collection "Disinfect" Sponge Refill with Polyester Lamination

- Polyester lamination allows for tear-free application of disinfectants, cleaning and spill absorption
- Evenly distributes disinfectants to optimize manufacturer recommended contact times
- Unlike competitive products, this polyester is laminated to the foam without adhesives, which could contaminate surfaces
- Stainless Steel channel allows for multiple uses with multiple autoclave cycles
- Manufactured and sterilized in the USA **Sterile**
- Validated to 10⁻⁶ SAL per ISO 11137 **Sterile**
- Individually double bagged with Lot # and Indicator Dot on each package **Sterile**
- Certificate of Sterility available upon request with each shipment **Sterile**

89032-182	14" VWR Collection "Disinfect" Refill with Polyester	14 in	12	5 LR PR LB

VWR® Collection "Clean" Sponge Refill with Microfiber Lamination

- Microfiber lamination allows for a tear-free deep cleaning of contaminants and residues, while also applying disinfectant to the surfaces
- Unlike competitive products, this microfiber is laminated to the foam without the use of adhesives, which could contaminate surfaces
- Stainless Steel channel allows for multiple uses with multiple autoclave cycles
- Manufactured and sterilized in the USA **Sterile**
- Validated to 10⁻⁶ SAL per ISO 11137 **Sterile**
- Individually double bagged with Lot # and Indicator Dot on each package **Sterile**
- Certificate of Sterility available upon request with each shipment **Sterile**

Roll-O-Matic® CE "Absorb" Sponge Refill

- White CE Foam absorbs liquids four times quicker than common foam refills
- This white CE foam is extremely durable, and perfect for spill pick-up, also suitable for applying disinfectant and cleaning particles
- Autoclavable

VWR Cat. No.	Description	Size	Case	Application
89066-062	14" FHP CE "Absorb" Galvanized Refill	14 in	12	5 LR PR LB

CE Flat Sponge Mop

VWR® Collection Flat Sponge Mop with Polyester Lamination

- Polyester lamination allows for tear-free application of disinfectants, cleaning and spill absorption
- Polyester allows for optimized manufacturer recommended contact times for disinfectants
- Unlike competitive products, this polyester is laminated to the foam without the use of adhesives, which could contaminate surfaces
- Fits common plastic and stainless steel flat mopping frames
- Autoclavable
- Manufactured and sterilized in the USA **Sterile**
- Validated to 10⁻⁶ SAL per ISO 11137 **Sterile**
- Individually double bagged with Lot # and Indicator Dot on each package **Sterile**
- Certificate of Sterility available upon request with each shipment **Sterile**

89032-166	16" VWR Collection Flat Mop	16 in	50	5 LR PR LB

CombiSpeed Pro Mop Frame

- 16" breakaway frame can be used with CE Flat Sponge Mop, pocket and strip mop systems
- Slim, angled frame ends and symmetrical double axis - improves easy entry into sponge and pocket mops
- Low cleaning angle improves cleaning beneath and behind obstacles
- Attaches to Vileda Extendable Handles

Controlled Environment Trolleys

Trolleys that meet the highest cleanroom standards

The CE Trolley range has been specifically designed and developed for use in controlled environments where maximum contamination control is needed. The trolleys are electro-polished stainless steel with air tight connections and smooth weldings. This ensures excellent biological control while still being easy to clean and fully autoclavable. The trolleys are extremely functional and versatile with superior ergonomics. Both trolleys offer ample space for all utensils needed for effective cleaning and are fully customizable to meet your exact needs.

They carry what you need

But not bacteria or contaminants!

Both trolleys offer ample space for all utensils needed while cleaning effectively. Each trolley can be customized with various buckets, boxes, sieves, bin bags - you decide and specify!

Both trolleys can be used with the new innovative Vileda Professional® Dip-N-Go sieve. This is ideal for areas that require high disinfection contact times.

When designing these trolleys, our full focus was in maximizing contamination control. This is why we electro-polished our stainless steel, provided true smooth weldings, and ensured tight fittings. These trolleys are easily wiped down or disassembled and autoclavable.

CE Pre-Prepared Trolley ●

Handle Holders ● ○

Two stainless mop handle holders, one on each side allowing fixation of handles.

Support Bars ● ○

Support bar for DuoPress Wringer or Dip-N-Go Sieve, Support Plate and commonly used industry wringers.

Frame Holders ● ○

One on each side allowing for storage of various sized mops including Roll-O-Matic® and DuoMops.

Working Station ●

Top shelf with fixed box position for 1 pre-box or 2 x 6l buckets.

Working Station ○

Storage area on rear of trolley fitting 25l longish bucket or 2 x 6l buckets.

Storage Area ●

Store your pre-prepared mop box or 25l longish bucket.

CE Bucket Trolley ○

Bin-bag Holder ●

70l bin bag holder to dispose of used mops.

Third Bucket Extension ○

25L Longish Bucket converts the double bucket to a triple bucket system.

Color coded system ● ○

Single, double, or even triple bucket (not pictured) options. Buckets and pre-prepared mop boxes include color coded clips allowing full color coding.

Cleanroom Casters ● ○

Autoclavable. Extremely quiet. Each trolley is equipped with four casters, two with brakes.

Electro Polished ● ○

Electro-polished for a contamination-free surface. Also autoclavable.

Trolley Support Half Tray

- For use on the CE Pre-Prepared Trolley
- Stores two 6l buckets or one pre-prepared box
- Autoclavable

VWR Cat. No.	Description	Size	Case	Application
10153-170	Trolley Support Half Tray	15.5 x 11 x 2.5 in	5	5 LR PR LB

CE Dip-N-Go Sieve

- Use when high disinfectant contact times are needed or deep wringing is not required
- Can be used with CE Pre-Prepared Trolley and CE Bucket Systems Trolley
- Stainless Steel
- Autoclavable

VWR Cat. No.	Description	Size	Case	Application
10146-010	CE Dip-N-Go Sieve	21 x 7 x 2 in	1	5 LR PR LB
10153-172	CE Sieve Support Plate (required when using CE Dip-N-Go Sieve on the CE Pre-Prepared Trolley)	22 x 7 x 3 in	1	5 LR PR LB

DuoPress Wringer

- For use on the CE Bucket Trolley with the bucket method
- 100% Polypropylene chassis and stainless steel lever
- Effectively wrings Duo mops
- Ergonomic lever for maximum pressure with minimum effort
- Autoclavable

VWR Cat. No.	Description	Size	Case	Application
89413-090	DuoPress Wringer	21 x 9 x 6.3 in	1	5 LR PR LB

25l Longish Bucket

- For use on the CE Bucket Trolley or the CE Pre-Prepared Trolley
- Liquid measurement lines molded inside of bucket
- Color coding clips included to allow differentiation in colors of buckets (red, blue, green, yellow)
- Polypropylene bucket with stainless steel handle
- Autoclavable

VWR Cat. No.	Description	Size	Case	Application
89413-093	25l Longish Bucket with Color Coding Clips	22 x 10 x 11 in	10	5 LR PR LB

Pre-Prepared Mop Box

- For use on the CE Bucket Trolley or the CE Pre-Prepared Trolley
- Can be used for the pre-prepared method or as storage
- Easily stacked
- Color coding clips included to allow differentiation in colors of buckets (red, blue, green, yellow)
- Lid (sold separately) snaps on to the Pre-Prepared Box easily and securely
- Sieve (sold separately) includes evenly placed holes which ensure even saturation of mops
- Autoclavable

VWR Cat. No.	Description	Size	Case	Application
10153-174	Pre-Prepared Box	15 x 11 x 8 in	5	5 LR PR LB
10153-176	Lid for Pre-Prepared Box	15 x 11 x .1 in	5	5 LR PR LB
10153-178	Sieve for Pre-Prepared Box	16 x 12 x 5 in	3	5 LR PR LB

6l Bucket

- Can be used individually, but also for use on the CE Bucket Trolley or CE Pre-Prepared Trolley
- High quality polypropylene buckets
- Color coding clips included to allow differentiation in colors of buckets (red, blue, green, yellow)
- Autoclavable

VWR Cat. No.	Description	Size	Case	Application
10153-180	6l Buckets	11 x 8 x 7 in	10	5 LR PR LB
10153-182	Lid for 6l Bucket	11 x 8 x .1 in	12	5 LR PR LB

Compact Bucket System

High performance in a compact design

There's a trend change in cleanrooms.

From a cost and functionality point of view cleanrooms are decreasing in size, affecting the areas to be cleaned as well as the storage rooms for the cleaning equipment. The solution is the new cleanroom compact bucket system concept.

Maximum Performance with minimum footprint

- Perfect for use with all Roll-O-Matic Mops (without Sieve)
- Solid and stable polypropylene plastic buckets and bails are 100 % autoclavable
- Unique electro-polished sieve with hole pattern, integrated bucket splash guard and handle support

Single 6 Gallon Bucket with Casters

- 1 x 6 gallon bucket
- Swivel plastic casters. Fully autoclavable, fixed to the bucket with a stainless steel pin connection

Double Bucket Chassis with 2 x 6 Gallon Buckets

- 2 x 6 gallon buckets
- Electro-polished stainless steel chassis. Chassis features a unique design to keep bucket upright
- Stainless steel autoclavable casters. Fixed stainless steel screw/nut connection on the chassis

VWR Cat. No.	Description	Size	Case	Application
10769-302	Single 6 Gallon Bucket with Casters (autoclavable) - blue	22 x 12 x 14 in	1	   
10769-300	Double Bucket Chassis with 2 x 6 Gallon Buckets (autoclavable) - blue/red	22 x 24 x 14 in	1	   
10769-304	Sieve for Single and Double Bucket Systems	19 x 5 x 6 in	1	   

EvoControl Microfiber Cleanroom Wipes

Maximize contamination control with EvoControl Microfiber Cleanroom wipes.

Thanks to its unique microfiber structure, EvoControl cleanroom wipes provide revolutionary cleaning results that meet the strict contamination control demands from the pharmaceutical, biotech, and microelectronics markets. Remove contaminants in one swipe, leaving the surface clean and free of residual contamination. This is critical for wiping spills and removing particles from the surface. The EvoControl's efficiency has been tested by an independent institute which proved 99.999% bacterial removal from surfaces without the use of disinfectant thanks to the unique and patented Evolon® microfiber material.

The math is pretty simple – what could a production stop cost you? What could disposal of a complete production batch cost you?

With the right wiping solution you ensure smooth daily production from a contamination control perspective. Plus, you benefit from Vileda Professional®'s products that focus on lowest cost-in-use.

EvoControl is the key to contamination control

Our extensive R&D work has produced a patented Microfiber that offers exceptional cleaning of critical surfaces and liquid absorption that is superior to polyester.

Excellent cleaning performance based on experience

When choosing Vileda Professional® cleanroom wipes, you can be sure you are using utensils designed and manufactured by professional cleaning experts.

For more than 50 years, Vileda Professional® has been a world leader in developing cleaning systems for high end applications.

Contamination control and particle release control are key factors that the Vileda Professional® wiping range brings to your daily cleaning tasks.

EvoControl: wipes that cover all your needs

Evenly distribute disinfectants

The balance between liquid absorbency and release to the surface is ideal for applying a film of liquid to a surface in cleanroom areas.

EvoControl wipes have been developed and designed to hold the right amount of liquid, distributing it readily and evenly onto the surface, thereby reaching the desired and critical contact times.

EvoControl is based on Evolon® – a patented, fully inline production process. EvoControl is the next generation microfiber cloth manufactured from endless microfibers measuring 0.15 dtex (10 times finer than standard Polyester microfibers). The unique fabric combines excellent textile and mechanical properties.

Remove contaminants in one wipe

Easily wipe spills and remove particles from a surface using a one step movement with EvoControl wipes. The EvoControl's efficiency has been tested by an independent institute and provides 99.999% bacterial removal from surfaces without the use of disinfectants.

The key is the unique and patented Evolon® microfiber material. For the user, it saves time, money and ergonomic stress.

EvoControl Microfiber Cleanroom wipes

- Clean glass and stainless steel without leaving residues or streaks
- High contact area of the wipe on the surface for superior cleaning results
- 10 times finer than a standard knitted polyester cleanroom wipe meaning microfibers reach even into microscopic surface pores to remove contamination thoroughly
- Maximize particle pick-up
- Maximize bacteria removal(99.999%)
- Cut fibers are melted together for a perfectly sealed edge which prevents particle release

EvoControl 200

- Disposable precision cleaning wipe
- Designed for fine wiping
- Laser cut sealed edge wipe for areas where moderate contamination control is required

EvoControl 400

- Disposable liquid cleaning wipe
- Designed for contamination removal
- Pre-laundered, laser cut and designed for the removal of acids and chemical spills

SpillEx

SpillEx - the problem solver

Spillages on hard floors can cause considerable problems. In cleanrooms and controlled environments, spills create slip hazards and are not easily removed. Spills usually require a bulky mop system or a large number of expensive wipes that may not absorb well. In Lab Animal Research facilities, animal urine on floors and benches require fast and sanitary removal. Not to worry. There is a solution to spillage problems – SpillEx from Vileda Professional®.

SpillEx

- Highly absorbent pad ideal for removal of water based spills from hard floors
- Ultra-thin construction moves excess liquid quickly to absorbent core
- Water-impermeable foil on back side allows no-touch removal after use
- High concentration of super absorbent particles for holding high volume of liquid without dripping
- One pad absorbs up to 41 oz of water and up to 17 oz of NaCl 0.9% (similar with urine)
- Will not drip when lifting and moving, as SpillEx transforms liquid into a gel
- Ideal for picking up a spillage already on floor or for use to collect dripping from equipment above the floor

VWR Cat. No.	Description	Size	Pack	Case	Application
10756-160	SpillEx - Hi absorbent pad	20 x 15 in	20	200	7 LR PR LB

Accessories

CE Squeegee

- True cleanroom squeegee swivels 360° for full range of motion
- Use on floors, walls and ceilings after applying disinfectant
- Squeegee spills to the drain in controlled environments
- Resists autoclave, gamma and ETO processes
- Use with Vileda Extendable Handles

VWR Cat. No.	Description	Size	Case	Application
89066-050	Cleanroom Squeegee	21.2 x 5.1 x 5.1 in	10	5 LR PR LB
89066-060	Vileda Extendable Universal Handle with color rings	40 to 71 in	10	5 LR PR LB
10769-298	Vileda Extendable Universal Handle	19 to 35 in	10	5 LR PR LB

CE Sweeper and Pan

- Sweep up broken glass in your cleanroom quickly and easily
- No need to change gloves when an item is dropped on the floor
- Keeps workers from touching the floor within the controlled environment
- Can be sprayed or wiped down with common disinfectants
- Stands up easily for storage or can be hung
- Adjustable bag holder for different size collection bags

VWR Cat. No.	Description	Size	Case	Application
89132-690	CE Sweeper	35.4 x 7.8 x 19 in	5	5 LR PR LB
89132-692	CE Sweeper Pan	30.7 x 12.2 x 6.8 in	5	5 LR PR LB

Buckets (6 gal)

- Available in blue or red for color coding
- Ideal for 10" and 14" Roll-O-Matic® Mops
- Fits most popular cleanroom cart systems
- Buckets are autoclavable
- Casters sold separately (#10153-934/ 4pk)

VWR Cat. No.	Description	Size	Case	Application
89134-307	6 gal Bucket - blue (not pictured)	22 x 12 x 10 in	10	5 LR PR LB
89134-305	6 gal Bucket - red	22 x 12 x 10 in	10	5 LR PR LB
10153-934	Set Of Casters (not autoclavable) for 6 gal Buckets		4/pack	5 LR PR LB
10769-302	Single 6 Gallon Bucket with Casters (autoclavable) - blue (not pictured, see page 15)	22 x 12 x 14 in	1	5 LR PR LB

Tool Bracket Holder

- Completely non-rusting
- Ideal for all controlled environments
- Individual clips move left to right and are fully adjustable
- Clip holders can be attached individually to a wall or added to the tool bracket
- Available in either 18" or 36" lengths

VWR Cat. No.	Description	Size	Case	Application
89134-308	3 clip tool bracket	18 in bar	12	5 LR PR LB
89134-310	5 clip tool bracket	35 in bar	4	5 LR PR LB

NanoTech Micro Cloths

Remove and kill bacteria!

The NanoTech Micro cloth is the solution for all operations and environments where maximum touch area hygiene is paramount. The secret lies in that Nanoparticles of silver have been embedded in the microfiber. When the silver ions make direct contact with bacteria and germs, they are killed. This effectively prevents bacteria growth and the effect lasts for hundreds of washings. Plus, it has all of the appreciated properties of microfiber - high durability, one-step wiping, easy gliding and superior cleaning results.

Is there bacteria living on your laboratory or production surfaces?

Bacteria and germs are obvious threats you might face in your field of work. The race against bacteria growth and spreading is getting more and more intense, and today there are ways of overcoming this problem. The obvious wiping solution for an operation where maximum hygiene is paramount is the all-new NanoTech Micro cloth from Vileda Professional®. Designed with microfiber and silver ion technology to keep your business healthy!

Silver is the secret

NanoTech Micro is manufactured with endless microfibers by utilizing a patented Freudenberg® technology. Nanosilver particles are embedded into the microfiber. The silver provides a strong antibacterial performance. Once the bacteria has been removed from the surface, and is in the cloth, the bacteria are killed as they come in direct contact with the Nanosilver particles. This has been certified by the acknowledged German Institute of Hohenstein (Report No. 09.8.3-0024), leaving a durable/reusable cloth which can be rinsed and reused hundreds of times.

Remove and kill bacteria

Based on thorough research and development, we are proud to be the first to introduce a cloth that keeps your operational environment as hygienic and healthy as possible. The new NanoTech Micro cloth not only wipes away bacteria, it even kills this bacteria as it makes direct contact with the nanoparticles of silver embedded in the microfiber filaments.

NanoTech Micro cloths

- Nanosilver particles are embedded in the endless microfibers (Patented technology)
- 99.93% bacteria removal when wiping surfaces (Certified by BMA and Microsearch Labs, Ltd.)
- No growth of bacteria or germs on cloths for more than 24 hours
- Omit tumble-drying, as cloths can be stored in moist condition for 24 hours without bacteria growth
- Extremely low linting cloths
- Keeps antibacterial properties after 300+ laundry cycles
- Color coded to prevent cross contamination

VWR Cat. No.	Description	Size	Pack	Case	Application
89209-462	NanoTech - blue	15 x 16 in	5	100	7 LR PR LB
89209-464	NanoTech - green	15 x 16 in	5	100	7 LR PR LB

QuickStar Micro Cloths

QuickStar Micro cloths

- High chemical resistance against chlorine, bleach, disinfectants, peroxides, etc.
- Non-woven structure
- Easy to rinse clean, hairs and dirt do not cling to surface
- Very low-linting fabric due to patented endless fiber technology
- Launderable up to 300+ wash cycles

VWR Cat. No.	Description	Size	Pack	Case	Application
10756-154	QuickStar Micro - blue	16 x 16 in	5	100	7 LR PR LB

10756-156	Quickstar Micro - yellow	16 x 16 in	5	100	7 LR PR LB

PVAmicro Cloths

Clean and wipe dry in one single movement.

PVAmicro has a high cleaning performance as well as high absorbency to wipe the surface dry without leaving streaks or droplets behind! The cloth is made from PVA for absorbency and microfiber for performance, allowing you to wipe dry and clean in one single movement. PVAmicro rinses and wrings easily and comfortably, meaning lower stress on the user's hands. With its microfiber cleaning performance and the elimination of after-drying, PVAmicro will quickly become your favorite solution for fast and effective wiping.

PVA for absorbency.

Microfiber for performance.

PVA is renowned for its excellent absorbency in window cleaning applications. Microfiber offers effective dirt removal. The solution is obvious – PVAmicro! It has knitted microfiber for superior cleaning performance and PVA for best possible absorption and rinsing. With just one wiping movement the surface is clean and dry, which saves both time and money.

Streak-free. Scratch-free.

The unique PVA surface makes it easy to rinse out particles when dipping and wringing the cloth. No risk for scratch-

ing delicate surfaces, plus you leave nothing behind but a clean surface without streaks. High absorbency and very low water release - that's the professional PVAmicro.

Nice touch and feel

Thanks to the bulkiness, PVAmicro is very easy and comfortable to rinse and wring, with lower stress on hands. In dry conditions the cloth is somewhat stiff, but, after seconds in contact with water, it offers a very soft touch and feel. The microfiber cleaning performance and the elimination of after-drying will make PVAmicro the favorite solution for fast and effective wiping!

PVAmicro cloths

- The knitted microfiber ensures perfect results on almost all surfaces: glass, laboratory, stainless steel, and more
- The PVA has very good water absorbency, meaning streak-free wiping without after-drying
- PVAmicro holds 40 times less particle residue after rinsing, compared to knitted microfiber cloth
- Streak and scratch free performance

VWR Cat. No.	Description	Size	Pack	Case	Application
10153-218	PVAmicro - blue	13.4 x 15 in	5	100	8 LR PR LB

MicroRoll

MicroRoll

- 100% endless Microfiber
- Lint-free cleaning performance with a greater than 99.93% removal of bacteria
- Streak free performance
- 1 step cleaning with no additional workload
- Better cleaning result in less time
- Suitable for bucket or spray cleaning methods

VWR Cat. No.	Description	Size	Pack	Case	Application
10769-328	MicroRoll - white, 200 Sheets per Roll	13.75 x 9.75 in	1	4	7 LR PR LB

MicroOne

MicroOne

- MicroOne has proven performance of 99.9% bacterial removal
- MicroOne comes packed in re-sealable plastic bags that fit perfectly in our 6-liter bucket (#10153-180) and includes a customizable dosing sticker for lid of 6-liter bucket for maximum hygiene and handling
- The bag is excellent for use in pre-prepared cleaning - use 500 ml per 50/cloths for general cleaning to 600 ml per 50/cloths for disinfecting.
- Use once and throw away. Significantly reduces the risk of cross-contamination

UltraSpeed Pro Mopping Systems

Fill your bucket with new energy

The UltraSpeed Pro system was developed to be simple to use, flexible enough to clean difficult areas and offer maximum cleaning performance while significantly reducing mopping times. The result is a comprehensive floor cleaning system that sets new standards in usability, versatility, efficiency and ergonomics. The benefits can be summarized in a single phrase: performance made easy!

Are you having problems with traditional mopping?

There are many problems associated with traditional wet mopping methods including:

Poor Hygiene:

- Cotton mop heads suffer poor appearance after several uses and can smell from bacteria growth.

Low Performance:

- Mop heads are hard to control, making it easy to accidentally splash water on furniture and skirtings.
- Cotton stores high levels of water in the mop head after wringing, causing the mop head to aqua plane on the floor rather than clean it. The result is dirt being moved around the floor rather than removed from it.
- Traditional string mops do not last more than 25 cycles in the laundry.

Difficult to Use:

- Difficult to insert mop head into the bucket and press.
- Cannot be used to clean walls, skirtings and staircases.
- Heavy
- The wringing often involves complicated press mechanisms that can break.

UltraSpeed Pro is the Answer!

UltraSpeed Pro is based on an innovative wringer that simplifies flat mop wringing and is available in a choice of systems.

Hygienic:

- Microfiber mop pads machine washable over 300 times.

High Performance:

- 50% faster than conventional wet mopping.
- 35% faster drying = floors back in use quicker.
- 35% faster removal of stubborn dirt and stains.
- Unique, changeable color coding system within the mops.
- Special mop pad for use on safety floors.
- Modern professional design; no need for training

Easy to Use:

- Easy-to-control flat mopping removes the chance of splashing other surfaces while cleaning.
- Effectively cleans skirting boards, walls and staircases.
- 50% lighter than conventional systems in use.
- Chassis system allows buckets to be detached, reducing the weight when emptying and filling.

UltraSpeed Pro Single Bucket Ready to Go Kit

- Ready to Go Kit includes single bucket with downpress wringer, chassis, Vileda Extendable Universal Handle, 16" UltraSpeed Pro Frame and one UltraSpeed Trio Mop Pad
- Lightweight and robust bucket with ergonomic handles for carrying
- Patented press - fastest and most efficient press on the market
- Small and compact chassis (only 2.29 sq ft)
- Changeable color coding-clips within the buckets (blue, red, yellow and green)
- Push Bar kit is sold separately

VWR Cat. No.	Description	Size	Case	Application
10754-278	UltraSpeed Pro Single Bucket Ready to Go Kit	26 qt	1	7 LR PR LB
10798-982	Push Bar kit		1	7 LR PR LB

UltraSpeed Pro Double Bucket Ready to Go Kit

- Ready to Go Kit includes two buckets with downpress wringer, chassis, Push Bar kit, Vileda Extendable Universal Handle, 16" UltraSpeed Pro Frame and one UltraSpeed Trio Mop Pad
- Double bucket system allows for separation of dirty liquid and clean liquid
- Lightweight and robust buckets with ergonomic handles for carrying
- Patented press - fastest and most efficient press on the market
- Small and compact chassis (only 2.29 sq ft)
- Changeable color coding-clips within the buckets (blue, red, yellow and green)

VWR Cat. No.	Description	Size	Case	Application
10754-280	UltraSpeed Pro Double Bucket Ready to Go Kit	11 & 26 qt	1	7 LR PR LB

UltraSpeed Pro Breakaway Frame

- Lightweight, durable, autoclavable frame
- 40cm/16" breakaway frame can be used with UltraSpeed pads, standard pocket mops and flat sponge cleanroom mops
- Frame includes a modern swivel joint with integrated ball catch, making it easy to clean vertical surfaces
- Easy, fast rinsing and wringing of mops without removal from frame
- Attaches to Vileda Extendable Handles

VWR Cat. No.	Description	Size	Case	Application
10754-262	Ultraspeed Pro frame	16 in	10	7 LR PR LB

Vileda Extendable Universal Handles

- Lightweight, ergonomic and extremely durable extendable handles for controlled environments
- Extends with a twist of the wrist and resists autoclave, gamma and ETO processes
- 89066-060 is available with color coding clips (Blue, Red, Yellow, Green)
- Fits all Vileda Professional® frames, CE Squeegee and other commonly used frames

VWR Cat. No.	Description	Size	Pack	Case	Application
89066-060	Vileda Extendable Universal Handle with color rings	40 to 71 in	1	10	5 LR PR LB
10769-298	Vileda Extendable Universal Handle	19 to 35 in	1	10	5 LR PR LB

UltraSpeed MicroSafe Mop pad *

- Specialty mop for cleaning grit, rough, and safety floors
- Excellent for wet scrubbing stubborn dirt
- Maximum wash temperature 70° C / 155° F

VWR Cat. No.	Description	Size	Case	Application
89209-454	Ultraspeed MicroSafe mop pad with color tags	16 in	25	

UltraSpeed Trio Mop pad *

- White zone: Microfiber for high mechanical cleaning action - minimizes chemical use
- Grey zone: Polyester provides low friction and high durability
- Beige zone: Blended polyester and viscose to provide absorbency
- Maximum wash temperature 95° C / 203° F

VWR Cat. No.	Description	Size	Case	Application
10169-894	Ultraspeed Trio Mop pad with color tags	16 in	20	

UltraSpeed MicroPlus Mop pad *

- Microfiber mop pad with best cleaning performance and durability
- Dark grey striped cleaning zones allow scrubbing of stubborn dirt
- Cleaning zones clean stubborn dirt very easily
- Ideal for structured floors.
- Maximum wash temperature 60° C / 140° F

VWR Cat. No.	Description	Size	Case	Application
89134-274	Ultraspeed MicroPlus Mop pad with color tags	16 in	20	

UltraSpeed MicroLite Mop pad *

- "Lite Version" of the MicroPlus, offering high cleaning intensity with microfiber
- Polyamide stripes easily clean stubborn dirt
- For wet and moist mopping. Can be used for waxing
- Maximum wash temperature 70° C / 155° F

VWR Cat. No.	Description	Size	Case	Application
10153-184	Ultraspeed MicroLite mop pad with color tags	16 in	20	

MicroTech Pocket Mop

- A low friction mop which is ideal for use on unstructured floors, tiles etc. as the yarn construction takes the shape of any floor, removing trapped dirt
- Eliminate the need for dust mopping while dusting/wet mopping in one step
- For use with dipping/flat sieve systems and pre-prepared mopping applications
- Fits on UltraSpeed Pro Frame in addition to other common industry frames

VWR Cat. No.	Description	Size	Case	Application
10153-236	MicroTech Pocket Mop	16 in	20	

MicroPlus Pocket Mop

- Offers the highest cleaning performance thanks to the cut pile construction and is especially effective on sealed and smooth floors
- Dark grey patches offer an added abrasive to help eliminate difficult floor stains
- For use with dipping/flat sieve systems and pre-prepared mopping applications
- Fits on UltraSpeed Pro Frame in addition to other common industry frames

VWR Cat. No.	Description	Size	Case	Application
10153-238	MicroPlus Pocket Mop	16 in	20	

UltraSpeed Mini Mopping System

Small in Size. Large in Performance.

UltraSpeed Mini was created specifically to fulfill the requirements of all small area cleaning. The system combines the ergonomic, performance and hygiene benefits of the existing UltraSpeed range in a small, compact system.

UltraSpeed Mini Kit

- The compact 10.5 qt bucket and flat mop makes it ideal for laboratories, production areas, lab animal research facilities and offices
- Twice as fast as traditional wet mopping at cleaning small areas (215 sq ft), removing stubborn dirt and drying floors

VWR Cat. No.	Description	Size	Case	Application
89215-242	UltraSpeed Mini Starter Kit – Includes: 1 Bucket, 1 Wringer, 1 Frame, 1 MicroLite (pad), 1 SafeMop (pad) (Order Telescopic Handle #89215-244 separately)	60.6 x 13.8 x 13 in	1	8 LR PR LB
89215-244	UltraSpeed Mini Telescopic Handle	31.5 - 55 in	1	8 LR PR LB

UltraSpeed Mini MicroLite Mop pad

- 90% PES microfiber for outstanding cleaning performance
- 10% PA fiber (grey) for stubborn dirt removal
- Each mop includes four color coding tabs (red, blue, yellow, green) which can easily be cut off

VWR Cat. No.	Description	Size	Case	Application
89215-246	UltraSpeed Mini MicroLite Mop pads	16 in	3	8 LR PR LB

UltraSpeed Mini SafeMop Mop pad

- Specially developed for use on rough and safety flooring
- Extra hard cut pile brush fibers
- Each mop includes four color coding tabs (red, blue, yellow, green) which can easily be cut off

VWR Cat. No.	Description	Size	Case	Application
89215-248	UltraSpeed Mini SafeMop Mop pads	16 in	3	8 LR PR LB

UltraFlex Mopping System

As good as wet mopping gets!

Flexibility is UltraFlex's most obvious feature. The configurations are many and the beauty lies in how easily you can change or upgrade your UltraFlex as your needs and demands change. Design your optimal solution, and when times are changing, simply reconfigure your UltraFlex. Use either the bucket/string mop wringer combo or the bucket/UltraSpeed flat mop wringer combo along with the clean water bucket to make a true bucket-in-bucket system, keeping the clean and dirty water in two separate compartments. Each of the buckets come with four color coding tabs to easily identify buckets, reducing the potential for cross contamination.

Best in class ergonomics

Having healthy personnel pays off in the long run, and is one way of reducing wear and tear and body stress by providing cleaning tools with top class ergonomics.

UltraFlex has features that offer your cleaning staff tools that are easy-to-handle, easy-to-use and with a minimum of uncomfortable movements.

- Extended leg design prevents excessive bending to minimize back strain.
- DownPress wringer reduces force on string mops.
- Bails and support grips for easy handling.
- Adjustable telescopic handle (optional).
- Lightweight and easy-to-handle buckets.
- UltraSpeed flat mop wringer allows for easy wringing with ergonomic flat mops.

Best in class economy

From the beginning of the UltraFlex development, one clear goal was to offer users unbeatable cleaning economy.

The ergonomic properties are important because a healthy cleaning staff clearly contributes to your bottom line. The effective down press on UltraSpeed flat mop wringer reduces water release to the floor and thereby gets your floors ready for traffic in no time.

In addition, the clean water bucket configuration reduces water consumption and increases the cleaning area.

And above all – when working with UltraFlex you can feel and sense the overall high quality in every component, the basis for a long and trouble-free service life.

One bucket = 3 systems

UltraFlex: Flat Mopping

- Used with UltraSpeed mops
- Large 36 qt bucket
- UltraFlex can be put on most janitorial carts
- German engineered/stylish design
- Easy glide stainless steel casters
- Color coding tabs to reduce cross contamination
- Conforms with food service standards

10153-188	UltraFlex Extended Legs	4	7 LR PR LB

VoleoPro Trolley

Don't let the size fool you!

The VoleoPro trolley from Vileda Professional® is your perfect solution that grows with your demands. Big on the inside, small on the outside. VoleoPro is ideal when you need to carry a wide range of cleaning utensils while keeping the footprint as small as possible. One of the major advantages is that all large cleaning tools and accessories are kept within the trolley's outer limits, allowing for use within tight spots. Additionally, it is easy to maneuver and store.

When size and performance matters

With a size of 5.4 sq ft, the VoleoPro trolley is ideal when you need to carry a wide range of cleaning utensils while keeping the footprint as small as possible.

This is the most cleverly designed trolley you've ever seen. One of many advantages is that you don't have to leave vital utensils behind – in spite of the compact size. Add what you need for the daily cleaning work – VoleoPro has been designed to perfectly fit and carry all of Vileda Professional®'s floor cleaning systems and much more.

"Clean" exterior

One of the major advantages is that all large cleaning tools and accessories are kept within the trolley's outer limits. With nothing sticking out, the trolley is designed for tight spots, plus it is really easy to maneuver and store where space is limited.

Ready to clean out of the box

Another major advantage is the quick and easy assembly. Just open the flat box, take out the VoleoPro parts, and spend a couple of minutes putting the parts together – without tools – and you are ready to go!

VoleoPro Basic
(comes with bag)

Configuration 1:
Pre-prepared Method

Configuration 2:
Bucket Method
(UltraSpeed)

Configuration 3:
Bucket Method
(UltraFlex)

Unique frame holder
keeps your mop frame
securely in place.

Two snap-in handle
holders for long handle
equipment.

Easy changing and
opening of boxes.

Bin bag lid – folds
away easily and is
never in the way when
working. Also includes
holder for documenta-
tion

Form fitting base se-
curely holds mop
buckets and
pre-prepared boxes

Multifunctional bridge:
Box holder and extra
storage space, i.e. paper
(Optional)

Large rear casters
(fixed) for easy
maneuverability over
thresholds and
doorways

Swivel front casters:
One optional with
brake

11 positions for hooks
and fasteners:
Three different types,
interchangeable in all
positions

Accessories available:
Pin hook, handle hold-
er, longish hook

SprayPro Mopping System

Just Spray and Mop!

SprayPro is the professional, ready-to-use floor cleaning system for bucket free mopping. Just fill the handle with water and you have everything you need to clean hard flooring and staircases in one easy-to-use unit.

SprayPro Mopping System

- Lightweight and easy to use
- Controlled water release- 3ml with each spray
- Color coded stickers with each handle (Red, Blue, Green, Yellow)
- Ergonomic hand grip is easy to use in figure 8 and S movements
- Cleans over 807 sq ft
- Water/solution is stored in the handle- no external bottles interfering with mopping
- Simple spray trigger
- Universal frame connector works with all Vileda Professional® cleaning systems
