

## VWR<sup>®</sup> PIPET TIPS FOR RAININ<sup>®</sup> LTS<sup>®</sup> PIPETTORS

Ergonomic Design

Validated Medical  
Grade Sterile

Free of ATP, DNase,  
RNase, endotoxin, and  
trace metals

**VWR® Pipet Tips for Rainin® LTS® Pipettors** bring higher quality, performance, and sustainability to ergonomic pipetting.

These VWR® pipet tips are made of clear, pretested polypropylene resin and are autoclavable.

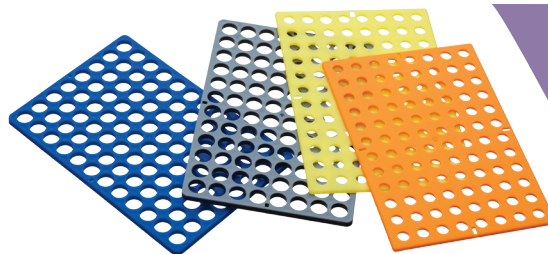

These tips are lot certified pure and free of **RNase/DNase, ATP, Endotoxin, and Trace Metals**. The aerosol filter pipet tips are additionally certified free of **Protease and Human DNA**. Unlike presterilized pipet tips from other brands, these tips use a validated sterile process (ISO) and can be used for medical research and diagnostics.

Empty Refillable Racks for 100-1250µl Tips	6	48	<b>46620-310</b>

*Single color racks available. Contact your VWR representative for ordering information.*

## PACKAGING OPTIONS

#### Next Generation Refills

Next Generation refill systems refill VWR and other brands of pipet tip racks. Their low carbon footprint makes them an ideal solution to waste reduction goals for your lab. You don't need gloves to refill your tip racks - Next Generation refills racks without your having to touch the new tips.

#### 96 Hinged Racks

96 Hinged Racks are extremely durable and stable and won't tip over when pipetting with a multi-channel pipettor. With smooth rounded edges and a reinforced seal, these racks are strong enough to be autoclaved.

#### Loose Packs

Loose pack pipet tips are supplied in resealable polyethylene bags. These are not recommended if you plan to store the tips for long periods since tip warping can occur over time in bags.

# Aerosol Filter Pipet Tips For Rainin® LTS® Pipettors

Pipetting shouldn't be painful.

With VWR® pipet tips for Rainin® LTS® pipettors, it isn't.

The repetitive action of mounting and ejecting pipet tips, aspirating and dispensing liquids over and over again can place significant strain on your thumb, hand, and arm, while putting you at risk for repetitive strain injuries.

VWR® pipet tips for Rainin® LTS® pipettors are designed to mount and eject with less force than twisting the cap on a water or soda bottle.
