in vivo transfection: *in vivo*-jetPEI®

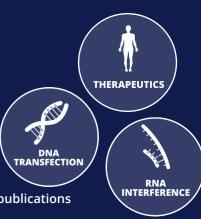

Polyolus

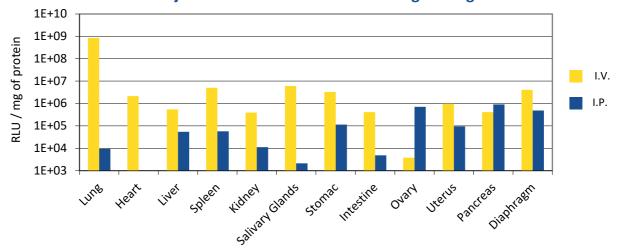

in vivo transfection

in vivo-jetPEI®

- Polyvalent: *in vivo* delivery of DNA, si/sh/miRNA in any animal model
- Easy to use: Two-step protocol
- Successful: Used from fundamental research to Human clinical trials
- Renowned: Most advanced *in vivo* transfection technology with over 700 peer-reviewed publications

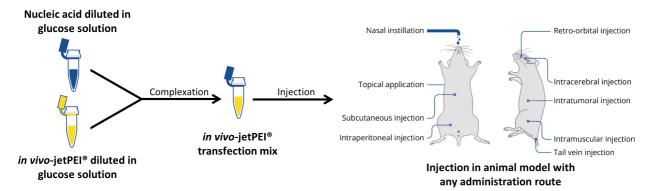

in vivo-jetPEI® can be used in a wide range of organs:

Complexes were formed following standard protocols.

Easy-to-use 2 steps protocol:

Product	Cat N°	Reagent size	Amount of 10% glucose solution
in vivo-jetPEI®	89129-960	0.1 ml	10 m
	89129-962	0.5 ml	2 x 10 ml
