## VWR® AUTOMATION PIPET TIPS

### ROBOTIC TIPS COMPATIBLE WITH HAMILTON MICROLAB STAR™, NIMBUS™, AND VANTAGE™

The high-quality production of our robotic tips guarantees that even small volumes of liquid can be dosed with high precision and without contamination. The conductivity enables the system to recognize the filling height and will guarantee a minimal immersion of the tip into the liquid. We offer a range of packaging options to meet the needs of your lab.

- High concentricity and fitting accuracy
- Provide high precision with low residual moisture
- Manufactured under cleanroom conditions
- Free of DNase, RNase, ATP, and pyrogens
- Made from pure polypropylene (PP)
- Each lot of tips is tested according to a strict quality management system to ensure reproducible results in the lab
