

Automated Aliquoting from Avantor

Automated aliquoting from Avantor's Biorepository and Archiving services significantly cuts the time taken to aliquot at volume - and reduces the risk too. With our integrated processes, there are fewer links in the Chain of Custody, automatic sample back-ups, sample indexing and tracking, plus short and long term sample storage.

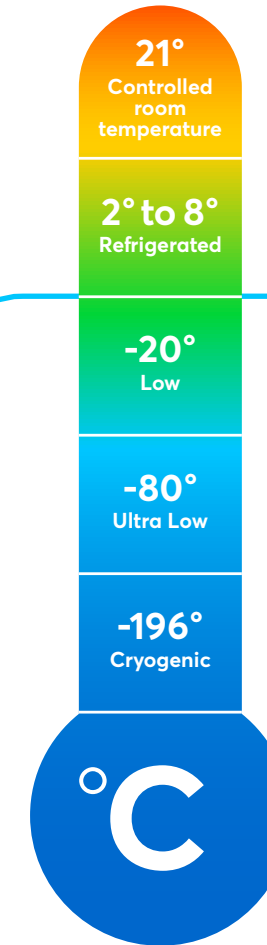

INBOUND BIOLOGICAL SAMPLE

CHILD SAMPLES

END TO END AUDIT TRAIL

AVANTOR TEMPERATURE CONTROLLED STORAGE

Parent and remaining child samples indexed and stored in our temperature controlled biorepository.

SECURE DISTRIBUTION

Child samples picked, packed, and shipped directly to third-party laboratories for analysis.

Indexed within our proprietary sample management system

Advantages of automated aliquoting by Avantor

- 100s - 1000s ALIQUOTS PER RUN
- INCREASED SPEED
- IMPROVED CONSISTENCY
- ADVANCED SECURITY
- GREATER EFFICIENCY
- MORE ACCURACY
- DECREASED HUMAN ERROR
- SUPERIOR METADATA MANAGEMENT
- EXTRA PRECISION
- REDUCED OVERALL RISK
