

## BSE / TSE Statement

---

### VWR\* POLYPROPYLENE GRADUATED CYLINDERS

---

This document certifies that these beakers meet the following criteria:

<b>North American Catalog N°:</b>	65000-008
<b>Description:</b>	VWR CYLINDER GRAD POLYPR 250ML

This certifies that the resins supplied to the manufacturer do not contain or come in contact with any animal origin.

The production of these materials utilizes processing steps with exposure to high temperatures that comply with those most recent scientifically recognized for inactivation of BSE. Specifically, the statements from our suppliers that the materials undergo severe processing conditions which completely destroy BSE proteins (temperatures greater than 200°C) and that processing of the raw materials meets the requirements of the European Council Decision 1999/534/EC (Measures applying to the processing of certain animal waste to protect against transmissible spongiform encephalopathies) for rendered fats derived from ruminant waste) and Compliance with note for guidance on minimizing the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products.(EMEA/410/01 Rev.3 – June 2004)

Additionally, production of the referenced plastics involves elevated processing temperatures which further reduce the possibility of BSE/TSE transmitter being present.

For these reasons, the referenced product is considered to be BSE/TSE protein free
